# The Office of Infrastructure Protection

National Protection and Programs Directorate
Department of Homeland Security

Protective Security Advisors and Special Event Domestic Incident
Tracker Overview

Federal Emergency Management Agency National Preparedness
Symposium

August 8, 2012

# The Role of Homeland Security

- Unify a National effort to secure America

- Prevent and deter terrorist attacks

- Protect against and respond to threats and hazards to the Nation

- Respond to and recover from acts of terrorism, natural disaster, or other emergencies

- Coordinate the protection of our Nation's critical infrastructure across all sectors

# Critical Infrastructure Protection Challenges

- Majority of critical infrastructure privately-owned

- The Department of Homeland Security (DHS) has limited legal authority to regulate security practices of private industry (exceptions: National Protection and Programs Directorate Office of Infrastructure Protection (NPPD/IP) (high-risk chemicals), Transportation Security Administration, United States Coast Guard)

- DHS; Sector-Specific Agencies; other Federal entities; the private sector; and State, local, tribal, and territorial governments all have roles and responsibilities in critical infrastructure protection
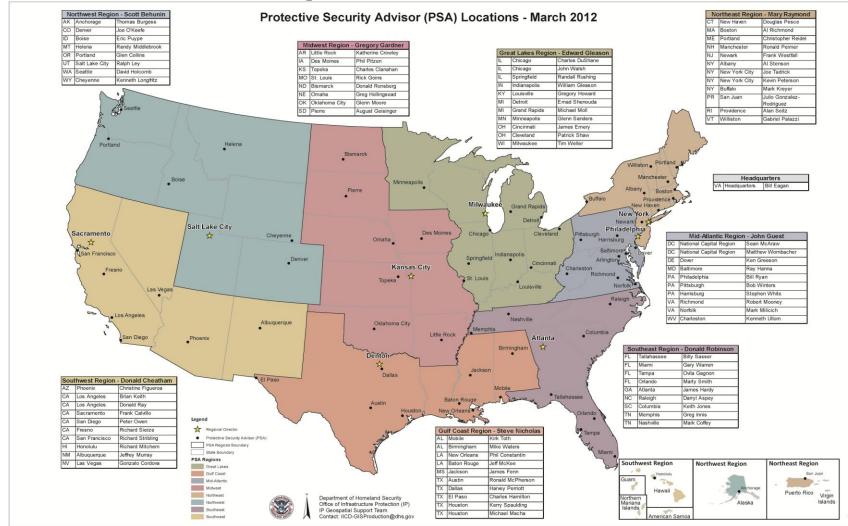

# Protective Security Advisors

- 93 Protective Security Advisors (PSAs) and Regional Directors, including 87 field deployed personnel, serve as critical infrastructure security specialists

- Deployed to 74 Districts in 50 states and Puerto Rico

- State, local, tribal, territorial, and private sector link to DHS infrastructure protection resources
  - Coordinate vulnerability assessments, training, and other DHS products and services
  - Provide vital link for information sharing in steady-state and incident response
  - Assist facility owners and operators with obtaining security clearances

- During contingency events, PSAs support the response, recovery, and reconstitution efforts of the States by serving as pre-designated Infrastructure Liaisons (IL) and Deputy ILs at the Joint Field Offices

**Homeland Security**

# Protective Security Advisor Locations

## Protective Security Advisor (PSA) Locations - March 2012

### Northwest Region - Scott Behunin

| | City | Advisor |
|---|---|---|
| AK | Anchorage | Thomas Burgess |
| CO | Denver | Joe O'Keefe |
| ID | Boise | Eric Puype |
| MT | Helena | Randy Middlebrook |
| OR | Portland | Glen Collins |
| UT | Salt Lake City | Ralph Ley |
| WA | Seattle | David Holcomb |
| WY | Cheyenne | Kenneth Longfritz |

### Midwest Region - Gregory Gardner

| | City | Advisor |
|---|---|---|
| AR | Little Rock | Katherine Crowley |
| IA | Des Moines | Phil Pitzen |
| KS | Topeka | Charles Clanahan |
| MO | St. Louis | Rick Goins |
| ND | Bismarck | Donald Ronsberg |
| NE | Omaha | Greg Hollingsead |
| OK | Oklahoma City | Glenn Moore |
| SD | Pierre | August Geisinger |

### Great Lakes Region - Edward Gleason

| | City | Advisor |
|---|---|---|
| IL | Chicago | Charles DuShane |
| IL | Chicago | John Walsh |
| IL | Springfield | Randall Rushing |
| IN | Indianapolis | William Gleason |
| KY | Louisville | Gregory Howard |
| MI | Detroit | Emad Shenouda |
| MI | Grand Rapids | Michael Moll |
| MN | Minneapolis | Glenn Sanders |
| OH | Cincinnati | James Emery |
| OH | Cleveland | Patrick Shaw |
| WI | Milwaukee | Tim Weller |

### Northeast Region - Mary Raymond

| | City | Advisor |
|---|---|---|
| CT | New Haven | Douglas Pesce |
| MA | Boston | Al Richmond |
| ME | Portland | Christopher Reidel |
| NH | Manchester | Ronald Peimer |
| NJ | Newark | Frank Westfall |
| NY | Albany | Al Stenson |
| NY | New York City | Joe Tadrick |
| NY | New York City | Kevin Peterson |
| NY | Buffalo | Mark Kreyer |
| PR | San Juan | Julio Gonzalez-Rodriguez |
| RI | Providence | Alan Seitz |
| VT | Williston | Gabriel Palazzi |

### Headquarters

| | | |
|---|---|---|
| VA | Headquarters | Bill Eagan |

### Mid-Atlantic Region - John Guest

| | City | Advisor |
|---|---|---|
| DC | National Capital Region | Sean McAraw |
| DC | National Capital Region | Matthew Wombacher |
| DE | Dover | Ken Greeson |
| MD | Baltimore | Ray Hanna |
| PA | Philadelphia | Bill Ryan |
| PA | Pittsburgh | Bob Winters |
| PA | Harrisburg | Stephen White |
| VA | Richmond | Robert Mooney |
| VA | Norfolk | Mark Milicich |
| WV | Charleston | Kenneth Ullom |

### Southeast Region - Donald Robinson

| | City | Advisor |
|---|---|---|
| FL | Tallahassee | Billy Sasser |
| FL | Miami | Gary Warren |
| FL | Tampa | Ovila Gagnon |
| FL | Orlando | Marty Smith |
| GA | Atlanta | James Hardy |
| NC | Raleigh | Darryl Aspey |
| SC | Columbia | Keith Jones |
| TN | Memphis | Greg Innis |
| TN | Nashville | Mark Coffey |

### Southwest Region - Donald Cheatham

| | City | Advisor |
|---|---|---|
| AZ | Phoenix | Christine Figueroa |
| CA | Los Angeles | Brian Keith |
| CA | Los Angeles | Donald Ray |
| CA | Sacramento | Frank Calvillo |
| CA | San Diego | Peter Owen |
| CA | Fresno | Richard Sierze |
| CA | San Francisco | Richard Stribling |
| HI | Honolulu | Richard Mitchem |
| NM | Albuquerque | Jeffrey Murray |
| NV | Las Vegas | Gonzalo Cordova |

### Gulf Coast Region - Steve Nicholas

| | City | Advisor |
|---|---|---|
| AL | Mobile | Kirk Toth |
| AL | Birmingham | Mike Waters |
| LA | New Orleans | Phil Constantin |
| LA | Baton Rouge | Jeff McKee |
| MS | Jackson | James Fenn |
| TX | Austin | Ronald McPherson |
| TX | Dallas | Harvey Perriott |
| TX | El Paso | Charles Hamilton |
| TX | Houston | Kerry Spaulding |
| TX | Houston | Michael Macha |

**Homeland Security**

# ECIP Initiative

- Establishes/enhances DHS relationship with facility owners and operators, and informs owners and operators of the importance of their facilities and the need to be vigilant
- Enhanced Critical Infrastructure Protection (ECIP) survey
  - Identifies facilities' physical security, security forces, security management, protective measures, information sharing, and dependencies
  - Tracks implementation of new protective measures
- ECIP Dashboard
  - Creates facility protective measures index that can be used to compare against similar facilities
  - Tool for informing protective measures planning and resource allocation
- Information is protected under the Protected Critical Infrastructure Information program
- Information used by DHS for steady-state analysis and incident management

# Homeland Security Information Network

- The Homeland Security Information Network (HSIN) is DHS's primary technology tool for trusted information sharing

- HSIN – Critical Sectors (HSIN-CS) enables direct communication between DHS; Federal, State, and local governments; and infrastructure owners and operators

- Content Includes:
  - Planning and Preparedness: Risk assessments, analysis, guidance, and security products; geospatial products and hurricane models; exercise and national event info
  - Incident Reporting and Updates: Real-time situational reports and alerts
  - Situational Awareness: Numerous recurring daily and monthly sector-specific and cross-sector reports on topics ranging from cybersecurity to emerging threats
  - Education and Training: Training on topics ranging from critical infrastructure resilience to threat detection and reaction for retail staff

# Vulnerability Assessment Programs

- Site Assistance Visits (SAVs)
  - Brings together Federal partners, State and local law enforcement, other emergency responders, and critical infrastructure owners and operators to conduct an "inside the fence" assessment that identifies critical assets, specific vulnerabilities, protective measures, dependencies/interdependencies, and options for consideration for improving security

- Computer Based Assessment Tool
  - A computer-based visual cross-platform tool that displays critical site assets and current security postures
  - Integrates SAV and Buffer Zone Plan assessment data with geospherical video and geospatial and hypermedia data
  - Assists owners and operators, local law enforcement, and emergency response personnel, to prepare for, respond to, and manage critical infrastructure, National Special Security Events, high-level special events, and contingency operations

Homeland Security

# TRIPwire and TRIPwire Community Gateway

- TRIPwire – Online unclassified network for law enforcement having bombing prevention responsibilities to discover and share tactics, techniques, and procedures of terrorist improvised explosive device (IED) use
  - Combines expert analysis with relevant documents gathered from terrorist sources to assist law enforcement's ability to anticipate, identify, and prevent IED incidents
- TRIPwire Community Gateway – Brings timely bombing prevention awareness information and analysis to the private sector with bombing prevention responsibilities
  - Responds to increasing private sector demand for bombing prevention information and assistance
  - Leverages content, expertise, and reputation of the existing TRIPwire system
  - Shares information on common site vulnerabilities, potential threat indicators, and effective protective measures for the 18 critical infrastructure sectors through HSIN-CS

**Homeland Security**

# Risk Mitigation Training

- **IED Awareness and Bomb Threat Management Workshop**
  - Provides an IED overview and focuses on the steps for managing bomb-related threats by outlining specific mitigation and response strategies to deal with explosive incidents and bomb threats

- **IED Search Procedures Workshop**
  - Enhances participants' knowledge of IED awareness, prevention measures, and planning protocols by outlining specific search techniques that reduce vulnerability and mitigate the risk of terrorist IED attacks

- **Protective Measures Course**
  - Provides owners and operators in the public/private sector with the knowledge to identify the appropriate protective measures for their unique sector

- **Surveillance Detection Course for Law Enforcement & Security Professionals**
  - Provides participants with the knowledge, skills, and abilities to detect hostile surveillance conducted against critical infrastructure

# Risk Mitigation Training (cont.)

- IED Counterterrorism Workshop
  - Enhances the knowledge of State and local law enforcement and public/private sector stakeholders by providing exposure to key elements of the IED threat, surveillance detection methods, and soft target awareness

- Counter-IED and Bomb Threat Management Workshop (Executive Level)
  - High-level workshop, designed for executives and critical infrastructure owners, provides exposure to key elements of the IED threat, soft target awareness, bomb threat management planning, and mitigation cost considerations in order to inform risk management planning

Homeland Security

# Special Event and Domestic Incident Tracker

- Introduction
- Objective
- Core Methodology
- Benefits
- Steady State
- Threat Matrix
- Special Event
- Domestic Incident
- Future Vision

# SEDIT Introduction

- The Special Event and Domestic Incident Tracker (SEDIT) is a Web-based tool for field-deployed members to enhance steady-state, special event, and domestic incident capabilities

- Applicable to advanced-warning natural hazards, catastrophic planning, and no-notice incidents

- Steady-state data collection allows field members to contribute to special event planning and respond to domestic incidents

- Displays steady-state baseline and mitigated risk for facilities and assets

- Provides predictive analysis regarding dependencies and cascading effects during an event or incident

- Enhances Federal, State, and local situational awareness based on consequence, vulnerability, and threat

Homeland Security

# SEDIT Introduction (cont.)

- Provides enhanced critical infrastructure information for State and local fusion centers through PSAs

- Tracker uses National Threat Matrix developed with the DHS Office of Intelligence and Analysis (DHS I&A) and has the ability to be modified locally

- Integrates SAV assessments and ECIP survey data in risk calculations

- Incorporates SAV and ECIP resilience data to support domestic incident response

**Homeland Security**

# SEDIT Objectives

- Identify and mitigate vulnerabilities at national high priority critical infrastructure facilities

- Support DHS infrastructure protection objectives
  - National Infrastructure Protection Plan – Risk Framework (e.g., develop core assessment methodology): Analyze risk, analyze protective measures in place, mitigation strategies to reduce risk
  - National Response Framework – Infrastructure Liaison: Resilience and dependencies/interdependencies

- Provide meaningful products to owners and operators
  - ECIP Dashboards (e.g., physical security)
  - Relevant Information (e.g., Common Vulnerability, Potential Indicators, and Protective Measure papers)
  - Follow up (e.g., specialized assessment)

**PROTECTION**

| Deter Threats | Mitigate Vulnerabilities | Minimize Consequences |
|---|---|---|
| Reducing attractiveness | Redundancy | Plans |
| Sharing information | Reliability | Enhanced emergency response |
| Increasing awareness | Physical measures | Training |
| | Cyber security | Exercises |
| | Personnel surety | Resiliency |

**Homeland Security**

# SEDIT Core Methodology

- Aligns methodology to ensure achievement of NPPD/IP and DHS goals

- Capitalizes on existing NPPD/IP processes and tools (e.g., ECIP and SAV)

- Minimizes duplication of effort

- Enhances interaction with the private sector

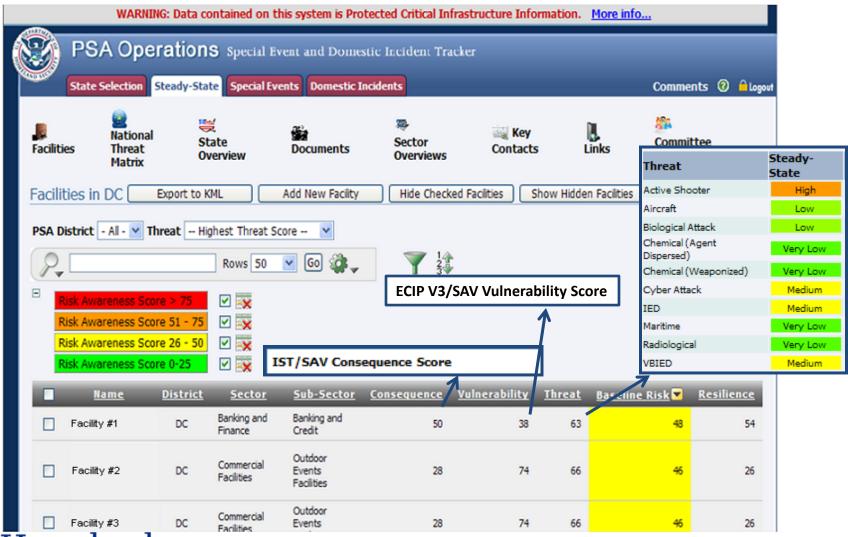

Homeland
Security

# SEDIT Benefits

- Improves information sharing between Federal, State, and local partners and facility owners and operators

- Enhances the Department's ability to analyze data and produce improved protection and resilience measures
  - Risk-based and scalable
  - Allows greater weight to be placed on consequence, vulnerability, or threats

- Presents streamlined and user-friendly functionality in support of special events and domestic incidents

- Increases efficiency in the field by cross-feeding data between steady state (baseline), special events, and domestic incidents

Homeland Security

# SEDIT Steady State

- Add facilities within each State
- Manipulate the following data within the facility:
  - Facility details
  - Facility Scores (Consequence, Vulnerability, Threat, Baseline Risk and Resilience) based on ECIP/SAV data and the National Threat Matrix
  - Improves risk score based on Consequence Survey function
  - Dependencies
- Information in steady state becomes basis for planning a special event or preparing for a domestic incident through protective and resilience measures

**Homeland Security**
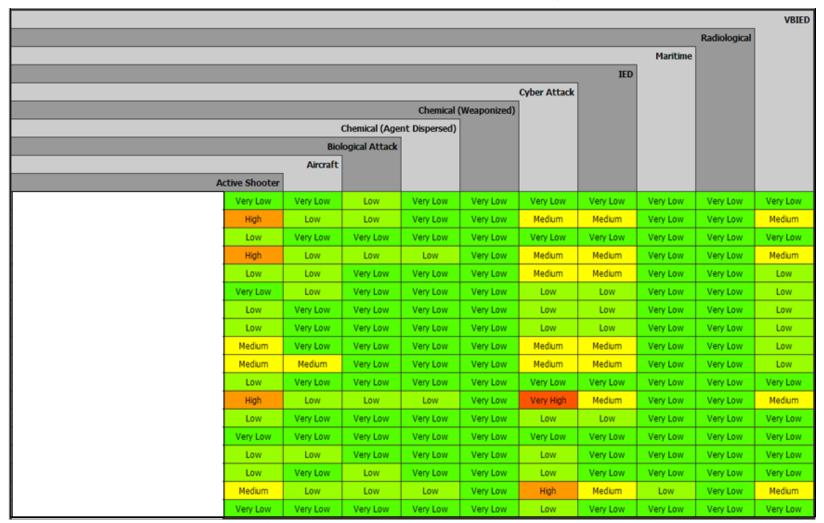

# SEDIT Steady State (cont.)

# National Threat Matrix – Steady State

- National Threat Matrix developed by DHS I&A in coordination with Argonne National Laboratory

- Ability to modify facilities in coordination with State and local partners and fusion centers

- National threat information populates facility threat information for special events

- Additional threat streams can be added for special events

**Homeland Security**

# National Threat Matrix – Steady State (cont.)

# SEDIT Special Events

- Key information captured such as description, location, PSA involvement, status, lead agency, significance, and dates
- Add special events in order to take into account real-time threat information and temporary measures as they are put in place
- Catalog primary and secondary venues, lifeline utilities, and supporting infrastructure
- Display baseline risk, mitigated risk, protection measures, and applicable threat scenarios
- Visually display infrastructure in Google Earth format

# SEDIT Special Events (cont.)

# SEDIT Domestic Incidents

- Key information captured such as description, location, and significance
- Modify vulnerability and threat based on incident impact
- Generate and track Requests for Action (RFAs)/Requests for Information (RFIs)
- Monitor and report on disruption of critical infrastructure
- Provide comprehensive pre- and post-incident information
- Track incidents involving multiple States
- Special events can be exported as a domestic incident
- Visually display infrastructure in Google Earth format
- Track and report infrastructure needs

Homeland
Security

# SEDIT Domestic Incidents (cont.)

# Future Updates

- Development of an improved threat matrix. Improvements will include the ability to delete or hide threats from the National Threat Matrix

- Utilize SHAPE files to calculate threat scores for natural disasters based on current or historic modeling

- Link WebEOC to RFI/RFA function in SEDIT
