WPS	Wireless Priority Service

INTRODUCTION

Beginning with FY2010 National Level Exercise (NLE) to engage the National Planning Scenario 1-Improvised Nuclear Detonation, the Training Working Group (TWG) has become an integral part of pre-exercise preparedness. To assist with the exercise preparedness activities, the Training Manual (TM) has been created to attempt to identify training for all levels of response and recovery. The training offered by exercise participants will be captured and indexed in this manual. To accomplish this task, significant participation was necessary from participating Emergency Support Functions (ESF) to build the index and the training aides found in this manual.

The TM is broken down to include training aides by ESF and functional discipline, as defined by exercise play, to assist with refined classification of necessary training for participating agencies and departments. So far, the functional discipline includes Policy and Governmental Administration to address the need for training elected officials and executive leadership in the dangers and risks associated with the detonation of an Improvised Nuclear Device (IND).

In the hopes of keeping the training new and updated, the TM should be refined as new National Planning Scenarios are exercised and/or training has been developed to address gaps identified through the After Action Conference and corresponding reports. In addition, as participant play expands and contracts, the need for refined or new training aides may become evident.

FEMA

REQUEST FOR TRAINING

In an effort to insure that requests for training are met in an efficient and effective fashion for the National Level Exercise 2010, the TWG will be assisting Federal, State, local, private sector and nongovernmental exercise players. The overall goal of the training request process is to assist exercise players with training identification based on the target capabilities being tested in the exercise, target audience identification for the training requests, space acquisition for the players in the actual training courses, making arrangements for “mobile” training as needed, and funding arrangements when appropriate.

The TWG strongly urges all exercise players to track the completion of exercise specific training. Training data will be collected for the After Action Report (AAR) for the National Level Exercise 2010. Through the AAR process the TWG hopes to be able to identify specific training that assisted the players in preparing them for the simulated incident (NLE 2010).

STEP 1: Based on training needs assessments exercise players (or organizations participating in NLE 2010) should review the training manual for training that will enhance capabilities. The TM identifies training by levels (awareness, performance, and management), by ESF and functional discipline, by delivery method (web-based, mobile, or resident) and by mission target capabilities. Training plans should be developed to meet the needs of the players/organizations.

STEP 2: Once specific training courses have been identified as part of individual or organizational training plans players/organizations should begin the process of enrolling in the actual training. Many of the awareness type courses identified in the TM are web-based. Individuals can simply reference the website contained in the TM and complete the training. Mobile or resident training courses will require the player or organization to contact the training provider based on the information contained in the Training Provider Index of the TM. In many cases your State Administrative Agency-Training Point of Contact (SAA-TPOC) can assist you in this process. FEMA Regional Offices, as well as, State Homeland Security/Emergency Management agencies also have training managers/officers that can assist you with the course enrollment process. Training organizations listed in the Training Provider Index typically list available training via on-line training catalogs. These same on-line sites will also provide you with training registration and enrollment procedures.

STEP 3: Based on your training assessments and plans you may have identified training from the TM that needs to be brought into the field (Mobile Training). Again the SAA-TPOC can assist you in making arrangements for mobile training. Resident training offered by the training organizations listed in the Training Provider Index can often accommodate multiple participants. The TWG is urging all training organizations listed in the index to give course acceptance priority to NLE 2010 exercise players

STEP 4: Exercise players/organizations requiring specific assistance on obtaining or arranging for training can also contact the TWG for assistance. Questions concerning the training listed in the TM can also be directed to the TWG. The following email address has been established for direct access to the TWG.

Shannon Rooney (Clark County OEM/HS): [SRooney](#)

Michelle Candee (NVDEM): [MCandee](#)

Tomas Kaselionis (FEMA): [TKaselionis](#)

NLE 2010 Training Request Form (Nevada Players Only)

Organization: Date:

Address: City:

State:

Contact Info: Work: Cell:

Email:

YES NO Is the requesting agency also the course manager?

YES NO Is this request Specific to NLE10?

Course Requested:

Course Name/ INDEX Course Date Course offered; or requested

Name of Venue:

Address:

City: <input type="text"/>	STATE: <input type="text"/>	ZIP: <input type="text"/>
----------------------------	-----------------------------	---------------------------

County Emergency Manager:

Is this course offered only for the county, organization or agency specified above?

Choose One If "NO", is this course open to other emergency responders? YES NO

Class size Minimum is 10, please indicate Maximum

(NDEM Training will assign the class size limit of 30 if none is specified)*

Point of Contact:

After completing this form, email it to: mcandee@dps.state.nv fax it to (775)687-0322. After the form has been received by NDEM Training we will contact the Requesting Agent to confirm the request and make materials pick up arrangements.

Training Aids By Emergency Support Function and Functional Discipline

August 2009

Organized by training elements, the training aids are arranged to display the Awareness, Performance, and Management levels required when responding or recovering from a disaster. The format for the training aids was intended to be user friendly and require little intervention for an outside source. Players should be able to use the format to conduct training needs assessments and gap analysis, and then use the TM to formulate training plans as required. Some training aids may require additional sections depending on the need for refined clarity with the ESF or functional discipline.

Rationale for constructing the training aides:

- Easy to use by players
- Quick reference to build capability
- Scalable

National Level Exercise 2010 Training Aid

ESF1 Transportation

Awareness

ID Course Title

- 036 TEPP Modular Emergency Response Radiological Transportation Training (MERRTT)

Training Course Index

August 2009

The training course index provides a convenient platform to combine the mixed course load available. The Index ID is unique to the Training Manual and is formatted to provide easy locators for the training aids. The training course index provides the end user with the course agency code, training provider, course title, course description, course length, Target Capability List cross reference, and if applicable, continuing education units.

FEMA

NLE 2010 Training Course Index

Index ID	001	Agency Code	84
Course Title	Intersection with Terror: Role of the Prosecutor and Community Corrections in Homeland Security		
Course Objective	The course is designed to coordinate the efforts of prosecutors and local community corrections officers in a collaborative and proactive identification of terrorism precursor activity. The course will focus on how to collect and share such information to the appropriate local, state and federal enforcement entities.		
Delivery:	Mobile (M)	Training Provider	APRI
Course Length	12 HRS	Mission TCL	Law Enforcement Investigation and Operations
Participant Cap		Mission TCL2	Public Safety and Security Response
CEU/POST		Mission TCL3	

Index ID	002	Agency Code	
Course Title	Public Health Planning for Radiological and Nuclear Terrorism		
Course Objective	This activity offers proactive education on the most up-to-date information on state and local public health emergency response planning for radiological and nuclear terrorism incidents. Public health officials at the state and local levels requested additional guidance on adapting all-hazards state and local emergency preparedness plans for radiological and nuclear incidents involving mass casualties. In response to these requests, this course will provide public health officials with the most current information regarding public health planning for response to radiation emergencies, including information on local government roles and responsibilities, radiologic monitoring of people (population monitoring), pharmaceutical countermeasures deployed by the strategic national stockpile, and the role of communications in a radiation emergency. http://www.bt.cdc.gov/radiation/masscasualties/publichealthplanning.asp

Course Title	Radiological Terrorism: Medical Response to Mass Casualties		
Course Objective	The purpose of this interactive self-study training is to provide clinician education on local medical response to mass casualties during the immediate aftermath of a radiological or nuclear terrorism incident. This program has two parts: 1) a series of six 5 to 20 minute lectures on potential radiological and nuclear incidents, emergency response planning, mass decontamination principles, triage, treatment and pharmacotherapy, and 2) a series of six simulated patient case studies designed to provide an opportunity to apply the lecture material. Each of the six studies depicts a hypothetical radiological terrorism incident. Supplemental literature and Web-based training resources are also provided. The program takes approximately 2 hours to complete. The learner can stop and start the program at their convenience. http://www.bt.cdc.gov/radiation/masscasualties/training.asp

Course Title	Preparing for Radiological Population Monitoring and Decontamination		
Course Objective	The Centers for Disease Control and Prevention (CDC) is working to develop radiological population monitoring guidelines for communities on the basis of consultation from experts from federal, state, local, and academic organizations. This broadcast will cover the basic components of these guidelines in development. It will also help community leaders and public health workers prepare to conduct short- and long-term monitoring of people affected by a nuclear or radiological terrorist incident or an accidental release of radioactive materials into the environment. A question-and-answer session will enable participants nationwide to pose questions to panelists by toll-free telephone, fax, or TTY lines. http://www2a.cdc.gov/phtn/Radiological2006/default.asp

Course Title	Managing Civil Actions in Threat Incidents (MCATI): Protester Devices		
Course Objective	<p>Public safety agencies that handle weapons of mass destruction (WMD) incidents are required to address any civil disturbances that arise as a result of these incidents. They need to be trained to understand the principles involved in MCATI. Poor crowd management within general proximity of a WMD event can easily exacerbate the spread of chemical or biological contamination, unless non-public safety persons are prevented from entering and exiting the threat zone. Civil actions associated with threat incidents are known by a variety of names: riots, civil disturbances, or protests—and can range from a small peaceful assembly to a large out-of-control, violent confrontation. Public safety officials must be prepared to handle the incident. This course provides State and local public safety agencies with the skills and tactics necessary to prepare for and successfully mitigate actions of protesters and their devices. The course provides classroom instruction detailing the history of devices, types of devices, tools to be considered for extrication, and safety considerations. The course also includes hands-on techniques using tools for defeating improvised protester devices. The primary course objective is to teach methods of recognizing, responding to, and counteracting protester tactics, such as human chains, barriers, and improvised devices. Additional course topics include, but are not limited to, extracting protesters, disabling devices, diverting attempts to create blockages, lock picking, teamwork, and using power tools and machines.</p>

Course Title	Weapons of Mass Destruction HazMat Evidence Collection		
Course Objective	This course involves instruction in how to collect weapons of mass destruction (WMD) hazardous materials (HazMat) evidence and ensure that collection protocols are followed and that proper chain of custody is maintained. This course meets the guidelines identified by the Federal Bureau of Investigation's (FBI) Hazardous Materials Response Unit (HMRU). Emergency responders may be asked to assist in hazard risk assessment and to act as a crime scene specialist in the actual collection of evidence at the direction of crime scene investigators. The objective is to provide public safety personnel with the skills and knowledge to effectively collect hazardous criminal evidence as a crime scene specialist at the direction of law enforcement. The course is composed of classroom hours and a practical scenario.

Course Title	Weapons of Mass Destruction Incident Command		
Course Objective	This in-depth training takes the participant through the entire spectrum of command of a weapons of mass destruction (WMD) terrorist event. The course provides instruction on WMD, the Incident Command System, and the National Response Plan. It examines the complexities of operational considerations and actions of command at a WMD event. The course takes the participant through pre- and post-event considerations by incorporating a segment on planning for the response using techniques that allow the commander to determine the correct composition of the planning team, evaluate the threat to the jurisdiction, identify and prioritize probable targets, measure required capabilities, and develop a local incident response plan to a WMD terrorist incident. The course culminates with the participant engaging in an 8-hour real-time tabletop exercise using the materials developed in the previous sessions to plan for and command the emergency response resources at the incident site

Course Title	Emergency Responders and the Deaf and Hard of Hearing Community: Taking the First Steps to Disaster Preparedness		
Course Objective	This course addresses fundamentals associated with emergency preparedness and response as it relates to deaf, hard of hearing, late-deafened, and deafblind (referred to as consumers). The class emphasizes the importance of preparedness among both consumers and emergency responders. Consumers should assess their preparedness for a disaster using information presented in this class. Consumers should also proactively establish a network among their local emergency managers and responders to ensure their issues are effectively communicated. Emergency responders gain a better understanding of the issues that face consumers regarding emergency preparedness. Emergency responders will also hear about some model programs that have helped reduce the communication barriers present for consumers and emergency responders during emergency preparedness. Activities are used throughout the class to demonstrate the lessons learned as well as foster a greater understanding between deaf, hard of hearing, and deafblind people and the emergency responders that serve them.

Course Title	DHS Basic Intelligence and Threat Analysis Course (BITAC)		
Course Objective	<p>This is a classified DHS Intelligence Enterprise (IE) course for intelligence professionals, to include state, local, tribal, and territorial law enforcement and first responder personnel. This entry-level course provides intelligence professionals with an introduction to the DHS IE and the Intelligence Community (IC). The curriculum explains the homeland security mission and teaches a variety of intelligence-related skills and concepts. The BITAC includes the following courses:</p> <ul style="list-style-type: none"> • Intelligence Community (IC) Overview – Course IC-110 • Critical Thinking and Analytic Methods (CTAM) – Course IE-120 • Intelligence Writing and Briefing (IWB) – Course IE-130 • Vulnerabilities and Threat Risk Assessment Course (VTRAC) – Course IE-150 <p>This course develops intelligence skills. It acculturates participants to the homeland security mission, vision, and core values. In addition, it trains entry intelligence personnel in a coherent team building fashion. It reflects the Homeland Security Intelligence Framework and likely threats against the Homeland. BITAC is designed in accordance with DHS core competencies, IC analytic core competencies, and the Learning Road Maps for Intelligence Professionals (Analytics). Throughout the course, students apply their newly acquired knowledge to homeland security-based exercises, culminating in a capstone exercise. Students' knowledge and understanding are assessed through written products and briefings. This course is taught up to the SECRET classification level.</p>

Course Title	Advanced Chemical & Biological Integrated Response Course (ACBIRC)-Technician Level		
Course Objective	This course is designed to provide students with hands-on problem-solving opportunities with regard to chemical and biological incident response. This course introduces topics and information, provide laboratory experiences, and culminate with free-play exercise to practice concepts taught in the classroom and laboratory. The course provides lectures and hands-on training in chemical and biological environments, focusing on agent characteristics, sampling, protection, detection, decontamination, and signatures. This onsite course allows students to work in a controlled environment with live agents in biological level 2 and 3 laboratories, and to research, develop, test, and evaluate (RDTE) solutions in certified chemical facilities. Biological and chemical stimulants laced with tracers are used to enhance practical exercises for real-time readings and realism of the training		
Delivery:	Resident (R)	Training Provider	Dugway
Course Length	40 HRS	Mission TCL	WMD/Hazardous Materials Response and Decontamination
Participant Cap		Mission TCL2	
CEU/POST		Mission TCL3

Course Title	Recovery from Disaster: The Local Government Role		
Course Objective	This resident course is designed for local disaster recovery teams consisting of emergency managers, city/county administrators, public works directors, building inspectors, and community planners. The course focuses on the roles and responsibilities of each team member, and provides guidance on developing a local disaster recovery plan. Best practices in disaster recovery are summarized in a CDROM toolkit included in course materials. Participants are given the opportunity to develop an outline of their own recovery plan during the course.

Course Title	Emergency Response to Hazardous Materials Incidents		
Course Objective	This course provides emergency response personnel, primarily firefighters, police officers, and emergency medical services personnel, with the information and skills needed to recognize, evaluate, and control an incident involving the release, or potential release, of hazardous materials. It is intended for members of hazardous materials response teams. The focus of the course is on recognizing and evaluating a hazardous materials incident, organizing the response team, protecting response personnel, identifying and using response resources, implementing basic control measures, refining decisionmaking skills, and protecting the public. Topics that are discussed include safety plans and standard operating procedures, chemical and physical properties of hazardous materials, incident command, sizeup strategy and tactics, containment and confinement of materials, levels of protection, chemical protective clothing, direct-reading instruments, and decontamination. Instructional methods used are lectures, class problem-solving sessions, and field exercises. Emphasis is on the hands-on use of equipment to apply lecture information in a practical manner. Participants will wear self-contained breathing apparatus (SCBA) fully-encapsulating suits and chemical splash suits. WEBSITE BASED CATALOG: http://www.trainex.org/bytitle.cfm

Course Title	Introduction to Nuclear Radiation for First Responders		
Course Objective	<p>Introduction to Nuclear Radiation for First Responders is designed to provide first responders and supporting personnel with an Awareness Level course along with some limited operational information.</p> <p>The training provides sufficient information to conduct the initial stages (recognition, identification, control, and rescue of victims) of a response to a radiological incident. This class lectures provide a focused knowledge base. Hands-on activities and demonstrations reinforce the lecture topics. Case study reviews are the culminating learning activity used to demonstrate how response operations occur in actual radiological incidents. A major emphasis of the class is the practical use of instrumentation. Participants are required to observe the response of a variety of radiological meters and detectors to radioactive materials. The class consists of 12 modules presented in a one 8-hour time period.</p> <p>WEBSITE CATALOG: http://www.trainex.org/bytitle.cfm</p>		
Delivery:	Resident (R)	Training Provider	EPA

Course Title	Large Vehicle Bomb Advanced Post Blast Investigation		
Course Objective	This 4.5-day course is designed to expose Federal, State, and local law enforcement investigative and bomb technician personnel to advanced techniques and procedures that have been successfully employed by the FBI during LVB investigations such as the World Trade Center (1993), Oklahoma City (1995), Khobar Towers, Saudi Arabia (1996), and U.S. Embassies in Kenya and Tanzania (1998). Instruction addresses the command and control procedures for a major LVB incident as well as forensic scene operations. The lectured discuss the problems and difficulties encountered in conducting an investigation into a massive crime scene that may involve an entire city in magnitude. Emphasis is on planning and preparation for the organization and management of an enormously complex crime scene.		
Delivery:	Mobile (M)	Training Provider	FBI

Course Title	Operations Security (OPSEC) for Public Safety Agencies		
Course Objective	Criminals and terrorists are becoming increasingly effective in collecting intelligence against U.S. agencies and corporations. To be successful, they need specific information about personnel, response plans, capabilities, and infrastructures. Operations Security (OPSEC) is a five-step risk management tool used by security professionals and the military that public safety agencies could use to deny our adversaries the sensitive information they need to plan their crimes and attacks. The OPSACTP is designed for public safety and special operations teams such as hazmat/WMD, bomb squads, tactical teams, arson and gang investigations, and the like. The OPSACTP teaches public safety officers from the law enforcement, fire-rescue, EMS and emergency management communities how to use OPSEC to protect you, your mission, and your family. Students who successfully complete this training will be able to apply OPSEC to emergency and special event planning; special operations such as SWAT, HazMat, WMD, Bomb Squad; intelligence, counter terrorism, arson, and narcotics task forces; and criminal investigations

Course Title	Sustaining the Intelligence Function in State, Local and Tribal Law Enforcement		
Course Objective	As a follow-up class to AWR 181, the Intelligence Toolbox, this course provides additional training tools to sustain the intelligence capacity within all-sized agencies. Core training components include Intelligence Led Policing (ILP); Establishing Public-Private Partnerships; and Open Source Information and Intelligence. Class participants will also receive an extensive audit tool to assist in determining what needs to be done in their law enforcement agency to implement or develop ILP.

Course Title	WMD Tactical Commanders		
Course Objective	In this course, participants receive an overview of emergency response to a weapons of mass destruction (WMD) event and are instructed how to obtain and integrate WMD incident-related intelligence into a tactical operations plan. Building on this foundation, participants are provided information allowing them to demonstrate the mission planning processes. As the course progresses, they use this knowledge to develop tactical warning orders, operations orders, and supplemental orders necessary to ensure a successful WMD incident response. A central component of this course is the practical exercises that are woven throughout several of the instructional modules—participants engage in warning order, emergency assault planning, and tactical command practical exercises.		
Delivery:	Mobile (M)	Training Provider	NCBRT-LSU

Course Title	A Prepared Jurisdiction: Integrated Response to a WMD Incident		
Course Objective	This course is a problem-based course for small- to medium-sized jurisdictions. The course provides an opportunity for the jurisdiction and its participants to develop and/or refine strategies for responding to incidents in which suspected WMD devices may be in transit via rail, truck, barge, or inter-modal cargo container. The course includes related training intended to provide realistic scenarios that will provide the foundation for the learning activities. This course affords opportunities for the jurisdiction's participants to train using a facilitated-discussion process supported by scenario-driven field training. Finally, the jurisdiction can use this training course as a self-assessment process for its decision-making capabilities, as well as its WMD-terrorist-response preparedness.

CEU/POST		Mission TCL3	

NLE 2010 Training Course Index

Index ID	123	Agency Code	MGT-316
Course Title	WMD Regional Task Force		
Course Objective	This course is designed to provide a basic understanding of the requirements and considerations for establishing, organizing, and operating a State or regional chemical biological, radiological, nuclear, and explosive (CBRNE) task force. Participants learn how to enhance their response capabilities to suspected CBRNE disasters within their state or region by the development of State or regional task forces. Topics covered in the course include initial team start-up considerations, legal and medical issues, team activations, response planning and activation, response implementation, response termination, program sustainment, and financial management		
Delivery:	Mobile (M)	Training Provider	NERRTC-TEEX
Course Length	24 HRS	Mission TCL	Community Preparedness and Participation
Participant Cap		Mission TCL2	
CEU/POST		Mission TCL3	

Index ID	124	Agency Code	MGT-313
Course Title	Incident Management /Unified Command (IM/UC) for CBRNE and Terrorism Incident		
Course Objective	The course trains emergency response supervisors and managers in the skills necessary to effectively plan for and manage a weapons of mass destruction (WMD) (chemical, biological, radiological, nuclear, and explosive [CBRNE])/terrorism incident by applying the all-hazards command and management structures found in the National Incident Management System (NIMS); with emphasis on the Incident Command System (ICS), multi-agency coordination systems, and public information systems. The course uses a multidiscipline jurisdictional team-building approach to accomplish the learning objectives. Upon course completion, participants possess a working knowledge of local, State, and Federal agency roles and responsibilities and their integration into a unified command for managing terrorism and CBRNE incidents, as well as other incidents of national significance, such as hurricanes or mass casualty incidents. The course delivery methodology consists of lectures, small group discussions, participant activities, multimedia scenarios, and a concluding tabletop exercise		
Delivery:	Mobile (M)	Training Provider	NERRTC-TEEX

NLE 2010 Training Course Index

Index ID	125	Agency Code	MGT-314
Course Title	Enhanced Incident Management/Unified Command (E IM/UC)		
Course Objective	This course focuses on incident management skills, staff responsibilities, and the related situational awareness and decision-making skills, using a computer-driven training simulation to offer a challenging decision-making environment in a chemical, biological, radiological, nuclear, and explosive (CBRNE)/terrorism scenario. The course focuses on the Incident Command Post and the key decision-making requirements within that response node. The course begins with a short overview of emergency response considerations and the Incident Command System (ICS) in a unified command structure followed by several rigorous computer-driven emergency response CBRNE/terrorism scenarios.		
Delivery:	Resident (R)	Training Provider	NERRTC-TEEX
Course Length	28 HRS	Mission TCL	Onsite Incident Management
Participant Cap		Mission TCL2	
CEU/POST		Mission TCL3

Course Title	DOD DSCA Phase 2		
Course Objective	Introduces national, state, local, and DOD statutes, directives, plans, command and control relationships, and capabilities with regard to DOD support for domestic emergencies and for designated law enforcement and other activities. Course is structured as standardized base-line training for all Defense Coordinating Officers (DCO), Defense Coordinating Elements (DCE), Emergency Preparedness Liaison Officers (EPLO), USNORTHCOM [to include Component Commands and subordinate Joint Task Forces (JTF)], Joint Directorate of Military Support (JDOMS), Joint Regional Medical Planners (JRMP), National Guard Bureau, and Service Staffs directly involved in DSCA missions. The DOD DSCA Course is available to interagency and intergovernmental audiences to provide broad-base professional development for certain outside-agency personnel. The second phase of the course consists of five days of academic classes and exercises utilizing a seminar format and interactive discussion based instruction with subject matter experts and guest speakers with recent and relevant civil support experience. The course will also employ a series of scenario-driven exercises designed to integrate course content with decision making and role playing.		
Delivery:	Resident (R)	Training Provider	NORAD-USNORTHCOM

NLE 2010 Training Course Index

Index ID	146	Agency Code	AWR-184
Course Title	Managing the Incident: A Leadership Guide to WMD Events		
Course Objective	<p>This course is designed to prepare sheriffs and senior law enforcement administrators to plan, equip, and train their departments to respond effectively to a weapons of mass destruction (WMD) incident. Course content and activities are directed toward the stimulation of critical thinking in participants. Throughout the course, an unfolding scenario challenges participants to test their preparedness, the preparedness of their agency, and the comprehensiveness of any plan that they may have developed. Participants obtain a better understanding of the roles and responsibilities of the many agencies that would respond to a WMD incident. They also gain an increased awareness of the potential contributions that their office can make to preparedness planning and response. In addition, attendees are prepared to enhance the ability of their civilian community to respond effectively to a WMD crisis event</p>		
Delivery:	Mobile (M)	Training Provider	NSA
Course Length	8 HRS	Mission TCL	Onsite Incident Management
Participant Cap		Mission TCL2	
CEU/POST		Mission TCL3	

Index ID	147	Agency Code	AWR-146
Course Title	Community Partnerships and Awareness Training		
Course Objective	<p>The course has been designed to show how to create a collaborative partnership between community members and public safety personnel who wish to better prepare for an allhazards event and who are interested in forming collaborative partnerships that strengthen the ability of their community to respond to a disaster.</p> <p>The course concentrates on preparation beginning at the family level, then moves to mobilization of communities, partnership building, and establishment of goal-oriented coalitions. Course modules cover topics that include awareness, preparation, prevention, response, and recovery. Once formed, these community partnerships will enable communities to identify possible targets, assess the level of threat to those targets and determine the resources required to effectively neutralize or minimize an attack, identify where to find those resources, manage an initial citizen response, and develop quickreference guides for their community.</p> <p>Emphasis is placed upon incorporation of existing programs (e.g. Neighborhood Watch, Citizen Corps etc.) into the overall community plan. Participants will receive training in all-hazards, terrorism and WMD, emergency management, community partnerships, and community action planning. The course will includes an unfolding desktop exercise specifically designed for the host community.</p>

NLE 2010 Training Course Index

Index ID	148	Agency Code	AWR-183
Course Title	Jail Evacuation, Planning, and Implementation		
Course Objective	This course has been designed to assist jail staff and their local emergency management office to develop and regularly examine their existing emergency plans and to add to these plans provisions for a complete, long-term jail evacuation. This class is designed to give jail officials (and other community and mutual aid responders) a new perspective regarding their institution and terrorism. It provides prevention and target hardening ideas, offers insights, and highlights areas for concern before, during, and after a jail evacuation event.		
Delivery:	Mobile (M)	Training Provider	NSA

Index ID	149	Agency Code	AWR-198
Course Title	First Responder Program		
Course Objective	This course is designed to prepare first responders and their supervisors to take the critical actions required in the initial phase of a response, enhancing their abilities to effectively and efficiently prepare for and coordinate incoming response units. The fourday residential program provides training intended to enhance each department's overall ability to prevent, plan for (and respond to) a large hazardous event, mass disruption of life sustaining services, and a potential or confirmed WMD. It provides 32 hours of classroom learning, activities, multiple tabletop exercises, and practical exercises that provide knowledge and tools for a controlled and safe response to all-hazard and WMD events. Training culminates with a large practical exercise which allows students to use the tools learned and put them to practical use. Course content includes, Site Assessment, Vulnerability, & Target Indicators, CBRNE, Incident Command System (ICS), National Incident Management System (NIMS), Bomb Threats, Booby Traps & Detonations, and Crowd Control & Evacuation.		
Delivery:	Resident (R)	Training Provider	NSA
Course Length	40 HRS	Mission TCL	WMD/Hazardous Materials Response and Decontamination

Course Title	WMD Homeland Security Initiative: An Executive Level Program for Sheriffs		
Course Objective	This course is designed to prepare sheriffs and top law enforcement administrators to plan, equip, and train their departments to respond effectively to a weapons of mass destruction (WMD) incident. The course is organized into modules that begin with an orientation covering WMD and the terrorist threat and then addresses recognition of a threat, notification, assessments and inventories, roles and responsibilities, incident management, communication, and documentation. Participants gain an understanding of the many roles and responsibilities and potential contributions that sheriffs can and must make to ensure the effectiveness of a community's overall response to these incidents		
Delivery:	Mobile (M)	Training Provider	NSA
Course Length	12 HRS	Mission TCL	Law Enforcement Investigation and Operations
Participant Cap		Mission TCL2	
CEU/POST		Mission TCL3	
Index ID	151	Agency Code	PER-240
Course Title	WMD Radiological/Nuclear Responder Operations Course		
Course Objective	This course prepares emergency response personnel to respond to an incident involving a radiological or nuclear weapon of mass destruction (WMD), such as a radiological dispersal device (RDD, "dirty bomb") or an improvised nuclear device (IND). Participants are taught to conduct radiological surveys of personnel, vehicles, facilities and outdoor areas. These hands-on activities blend cognitive knowledge of radiation and instruments with survey techniques used in detecting the presence of radiation, locating radioactive material, and measuring levels of radiation and radiological contamination. This course is delivered throughout the nation. Pre-course site surveys are conducted to identify and schedule classroom and urban training facilities for the hands-on activities and practical exercises.		
Delivery:	Mobile (M)	Training Provider	NTS-CTOS
Course Length	24 HRS	Mission TCL	WMD/Hazardous Materials Response and Decontamination

NLE 2010 Training Course Index

Index ID	153	Agency Code	PER-241
Course Title	Radiological/Nuclear Course for Hazardous Material (HazMat) Technicians		
Course Objective	The course prepares the hazardous materials (HazMat) technician to respond to an incident involving a radiological or nuclear weapon of mass destruction (WMD), such as a radiological dispersal device (RDD, "dirty bomb") or an improvised nuclear device (IND). This course is taught at the Nevada Test Site (NTS) providing unique hands-on experience with radiation fields. The hands-on activities blend cognitive knowledge of radiation and instruments with survey techniques used in detecting the presence of radiation, locating radioactive material, and measuring levels of radiation and radiological contamination.		
Delivery:	Resident (R)	Training Provider	NTS-CTOS
Course Length	32 HRS	Mission TCL	WMD/Hazardous Materials Response and Decontamination
Participant Cap		Mission TCL2	
CEU/POST	3.2 CEU	Mission TCL3	

Index ID	154	Agency Code	PER-243
Course Title	Personal Radiation Detection (PRD)		
Course Objective	This course is designed to train law enforcement and public safety officers to employ department procured and issued personal radiation detectors (PRD) within the bounds of the jurisdiction/agency operational environment, including local instruments, procedures, and legal considerations. The course provides training and extensive hands-on practice with real radioactive material. PRD instruments used in the course are the instruments owned and issued by the responder organization. The responder organization will provide PRDs for student use in the course, preferably one PRD per student.		
Delivery:	Mobile (M)	Training Provider	NTS-CTOS

Index ID	155	Agency Code	PER-244
Course Title	Detection Equipment for Law Enforcement (DELE)		
Course Objective	<p>This course prepares state and local law enforcement agencies to detect and report terrorist attempts to import, possess, store, transport, develop, or use radiological or nuclear material. DELE will teach individual patrol officers and detection-andinterdiction teams to detect, verify, locate, measure, identify, assess, and, if warranted, report radiation and radioactive material. DELE will prepare the local law enforcement team, upon the discovery of suspected illicit radioactive material, to seamlessly progress from detection through alarm resolution to search and response, in conjunction with regional and national assets. This course is designed to train law enforcement and public safety officers to employ department-issued personal radiation detectors (PRD) and radiation isotope identification devices (RIID) within the bounds of the jurisdiction/ agency operational environment, procedures, and legal considerations. The course provides extensive hands-on practice with radioactive materials, including combinations of innocent bulk cargo, simulated nuclear medical patients, industrial devices, and nuclear materials. PRD and RIID instruments used in this course are owned and issued by the participant's organization. The participants' organizations will provide PRDs for participants' use in the course, preferably one per participant. Counter Terrorism Operations Support (CTOS) may provide a limited number of RIIDs to supplement responder organizations' RIIDs during the course</p>

Course Title	Analysis 101		
Course Objective	<p>Analysis 101 is an entry level course that prepared new analysts to play their role in achieving the DNI's goals of transforming intelligence analysis and fully integrating the intelligence community. It brings together new analysts from throughout the IC during their initial months on the job for 18 days of rigorous training in a truly joint environment, equipping them with the analytic skills necessary to achieve the IC's published Analytic Standards. It does so by concentrating on how critical thinking fosters best practices in analytic tradecraft. Students examine the inter-related stages of the analytic process, discuss the many barriers and pitfalls (personal, organizational, technical, and environmental) that can impede it, and practice techniques that help overcome obstacles and improve analytic rigor. A core component is instructional and guided practice in thinking critically about the reasoning process. Working closely with peers from other agencies, new analysts acquire a common set of analytic skills and a joint perspective on intelligence enterprise, a solid foundation on which subsequent agency-specific training can build.</p> <p style="text-align: right;">This course is classified at the TOP SECRET//SI/TK level</p>

Course Title	Crisis Management for School-Based Incidents		
Course Objective	<p>this Awareness level course has been developed to educate rural law enforcement personnel as well as school administrators and personnel on the elements that must be in place to effectively respond to a school-based emergency. Rural schools, law enforcement, and other emergency responders are often limited in resources, so it is imperative that all potentially affected parties collaborate on planning, preparing, communicating, responding, and recovering from a school-based incident. This course provides an opportunity to partner the rural emergency response community and the local school systems. Specifically, this course will allow them to collaborate, communicate, and share information, to achieve coordinated awareness of, prevention of, protection against, and response to school-based incidents in a rural community</p>

Course Length	Varies	Mission TCL	
Participant Cap		Mission TCL2	
CEU/POST		Mission TCL3	
Index ID	165	Agency Code	AWR-154
Course Title	Principles of NIMS, Team Building, and Risk Communication		
Course Objective	It builds on the knowledge base from the previous courses in the Curriculum and provides participants knowledge of the operation of the National Incident Management System (NIMS) in the context of the principles of risk communication. The team building module enhances preparedness by improving participants' ability to work across organizational borders. By providing participants with information on the principles of risk communication against the backdrop of the NIMS, local community responders gain an understand risk communication as both a concept and an application. This course has been reviewed and approved as NIMS compliant by the NIMS Integration Center.		
Delivery:	Mobile (M)	Training Provider	UCD-WIFSS
Course Length	8 HRS	Mission TCL	Onsite Incident Management
Participant Cap		Mission TCL2	
CEU/POST		Mission TCL3

Course Title	Understanding the Dangers of Agro terrorism		
Course Objective	Local and regional emergency response teams gain an awareness of the potential targets and impacts of agroterrorism and learn how effective preplanning within a community can mitigate acts of agroterrorism.		
Delivery:	Mobile (M)	Training Provider	UCD-WIFSS
Course Length	6 HRS	Mission TCL	Food and Agriculture Safety and Defense
Participant Cap		Mission TCL2	
CEU/POST		Mission TCL3	
Index ID	168	Agency Code	AWR-156
Course Title	Principles of Planning and Implementing Recovery		
Course Objective	Using the lessons learned from the preceding courses in the curriculum, it trains traditional emergency responders and members of the agriculture community on recovery operations, procedures, and techniques following an incident of agroterrorism or food systems disaster. This course provides the fundamental framework for orchestrating the recovery from an incident of agroterrorism or food systems disaster. It defines recovery, and identifies the community stakeholders who must participate in the recovery and the activities involved in restoring public confidence and a sense of normalcy. This course provides specific steps for planning for recovery, both within participants' own organizations and as stakeholders in the larger community-wide incident command system. This course also helps enable participants to complete the overall curriculum and become members of frontline emergency response teams		
Delivery:	Mobile (M)	Training Provider	UCD-WIFSS

Course Title	Sport Event Risk Management		
Course Objective	This curriculum is focused upon building capabilities for multi-agency collaboration. Intact university teams will learn to agree on basic concepts relative to: planning, risk assessment, training, exercising plans, and recovery / business continuity through scenario-based training modules. The university teams will be composed of specialists from five distinct areas: campus police, athletic department, emergency management, fire/HazMat and emergency medical/health services. The expectation is for these leadership teams to return to their respective universities and coordinate development of a sport event security management system. The Sports Event Security Aware (SESA) system, developed by the Center for Spectator Sports Security Management (CSSSM), will be the basis for these back-home developments.

Course Title	Regional Collaboration & Tribal Partnerships		
Course Objective	Regional Collaboration & Tribal Partnerships is the introductory course in a training program designed to provide tailored, specific guidance in designing, expanding, and sustaining homeland security regionalization through the building of both tribal and nontribal collaborative partnerships across the United States. In this course, participants serve as representatives for their community for developing a homeland security regionalization initiative. Participants attending this course can expect a supportive learning environment that incorporates lively interactive discussions, hands-on activities, and take-home resources and continued learning opportunities. Course content includes an overview of capabilities-based planning, homeland security policies and procedures, existing programs that support regionalization initiatives, and the start-up procedures and policies necessary in creating, expanding, and sustaining homeland security regionalization initiatives, including strategic plans, timelines, MOUs, organizational structure and modus operandi, bylaws, and research tools. This unique training incorporates elements of a successful regionalization initiative model developed by NNALEA.

Index ID	185	Agency Code	NARAC 101
Course Title	NARAC 101 NARAC Dispersion Modeling		
Course Objective	When a hazardous material is released into the atmosphere, the National Atmospheric Release Advisory Center (NARAC) can map the probable spread of contamination in time for an emergency manager to decide if taking protective action is necessary. NARAC provides its customers with the ability to request automated atmospheric calculations through user friendly software interfaces or by contacting NARAC directly for support during an atmospheric hazard. This course starts by providing a brief overview of NARAC's role as an emergency response asset and its capabilities. This is followed by a comprehensive look at the terminology and science behind NARAC products to provide NARAC software users with an understanding of both the information needed to request a NARAC calculation and the resulting products. The target audience for this course is DOE/NNSA emergency responders, emergency managers, training managers, contractors, and others who use the automated atmospheric calculations to support their response during an atmospheric hazard.

Course Title	State Disaster Management		
Course Objective	This course provides fundamental information on the disaster assistance process and disaster assistance programs. During a disaster, States must be responsive to local jurisdictions and must effectively acquire and distribute Federal resources. State disaster management is complex, requiring that State staff members have accurate information on the Federal programs available and work with Federal counterparts in the management of those programs. As a State Coordinating Officer (SCO), you play a critical role in managing the response and recovery operations. Other State staff that have a vital role include Operations Officers, Individual Assistance (IA) Officers, Public Assistance (PA) Officers, Hazard Mitigation Officers (HMOs), Community Relations Managers, and Public Information Officers (PIOs).		
Delivery:	Web-Based (W)	Training Provider	EMI-IS
Course Length	10 HRS	Mission TCL	Emergency Operations Center Management
Participant Cap		Mission TCL2

Course Title	National Incident Management System (NIMS), An Introduction		
Course Objective	This course provides an introduction to the National Incident Management System (NIMS). At the end of this course, participants will be able to describe the intent of NIMS; describe the key concepts and principles underlying NIMS; describe the purpose of the NIMS Components, including Preparedness, Communications and Information Management, Resource Management, and Command and Management; and describe the purpose of the National Integration Center. This course provides a basic introduction to NIMS; it is not designed to replace Incident Command System and position-specific training.		
Delivery:	Web-Based (W)	Training Provider	EMI-IS

Course Title	IEMC: All Hazards Preparedness and Response		
Course Objective	This IEMC addresses preparedness and response in emergency situations resulting from severe weather-related hazards. This exercise-based course is conducted for participants from communities throughout the country. The IEMC places public officials and other key community leaders in a disaster simulation. The course methodologies of classroom instruction, planning sessions, and exercises allow for structured decision making in a learning environment that is nonetheless realistic. A key outcome of this IEMC is that additional planning needs are identified, providing the opportunity to enhance overall preparedness.		
Delivery:	Resident/Mobile	Training Provider	EMI

Course Title	IEMC: Homeland Security		
Course Objective	This IEMC focuses on preparing for and responding to the consequences of a terrorist act. Three scenarios are used for the functional exercises: chemical, biological, and explosive. This exercise-based course is conducted for participants from communities throughout the country. The IEMC places public officials and other key community leaders in a disaster simulation. The course methodologies of classroom instruction, planning sessions, and exercises allow for structured decision making in a realistic learning environment. In the IEMC: Homeland Security, special attention is placed on the response among agencies when the disaster area also is a crime scene. □ □		
Delivery:	Resident/Mobile	Training Provider	EMI
Course Length	4 Days	Mission TCL	Emergency Operations Center Management
Participant Cap		Mission TCL2	Onsite Incident Management
CEU/POST	2.8 CEU	Mission TCL3	Emergency Public Information and Warning
Index ID	229	Agency Code	E930
Course Title	IEMC: Community Specific		
Course Objective	Community-specific IEMCs place emphasis on a specific jurisdiction's risks, response capability, target capabilities, and short-term recovery issues. They are tailored to fit the jurisdictions and are based on a selected hazard scenario. Course methodologies include classroom instruction, group planning sessions, and exercises that allow for structured decision making in a learning environment. A key outcome of this IEMC is to provide participants with the ability to carry out their respective EOC functions related to disaster response and assist with making the transition from response activities to short-term recovery.		
Delivery:	Resident/Mobile	Training Provider	EMI
Course Length	4 Days	Mission TCL	Emergency Operations Center Management
Participant Cap		Mission TCL2	Onsite Incident Management
CEU/POST	2.8 CEU	Mission TCL3	Emergency Public Information and Warning
Index ID	230	Agency Code	E947
Course Title	IEMC: Emergency Operations Center–Incident Management Team Interface		
Course Objective	This course is a new resident course released in FY 2009 to provide an exercise environment for EOC members and IMT responders to practice communications and coordination between the EOC and field operations command during simulated incidents, both planned and unplanned. This course describes the roles, responsibilities, and relationships of local emergency operations centers (EOCs) and Incident Management Teams (IMTs). It trains participants on effective management of domestic incidents and exercises the interfaces between EOC personnel and All Hazards IMTs (Types 3, 4, and 5). This IEMC clarifies the difference between resource management at the EOC and on-scene command. It presents four ways an EOC can be organized and explains the difference between the IMT's on-scene command responsibilities and an EOC's coordination responsibilities. This course is delivered via classroom lectures, discussions, and functional exercises.		
Delivery:	Resident/Mobile	Training Provider	EMI
Course Length	4 Days	Mission TCL	Emergency Operations Center Management
