

Critical Infrastructure Protection and Suspicious Activity Reporting

Texas Department of Public Safety
Intelligence & Counterterrorism Division

Texas Homeland Security Strategic Plan

- GOAL: Prevent terrorist attacks in Texas and prevent criminal enterprises from operating successfully in Texas
 - OBJECTIVE: Expand and enhance the statewide intelligence capability that reduces the threat of terrorism
 - ACTION: Expand and enhance multi-agency, multi-jurisdictional fusion capabilities throughout the state
 - ACTION: Employ the Texas Fusion Center and regional fusion centers to integrate homeland security-related information and intelligence across all agencies, jurisdictions and disciplines in Texas
 - ACTION: Enlist the homeland security community, including health services, agriculture, animal health, private sector, and other critical infrastructure stakeholders, as collectors and consumers of intelligence

Office of Infrastructure Protection

Goal: Protect the state's Critical Infrastructure and Key Resources (CIKR) in support of the National Infrastructure Protection Plan.

- Develop Texas Infrastructure Protection Plan (TIPP) and appropriate Sector-Specific Plans.
- Coordinate with DHS, State Agencies, Local Governments, and the Private Sector to identify, validate, and update CIKR data within the State of Texas and develop appropriate strategies for protection and resiliency.
- Engage private sector partners through the Private Sector Advisory Council (PSAC) to implement CIKR protection.
- Advise the Governor or his/her designee on homeland security related issues pertaining to CIKR.
- Evaluate and assess threats, vulnerabilities and risks related to CIKR.

Working With Dam Owners & Operators

Physical Security & Cyber Security

- All-threat risk & vulnerability assessments
- Information sharing
- Understand system vulnerabilities and interdependencies
- Suspicious activity reporting
- Trend analysis
- Incorporate industry needs into strategy
- Strategic level planning
- Champion activities to protect dam infrastructure and promote resilience

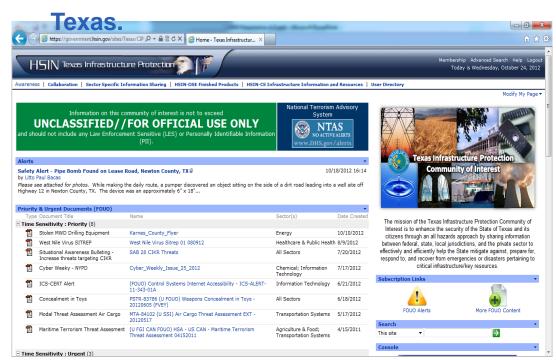

Critical Infrastructure/Key Resources

What is HSIN Texas Infrastructure Protection (HSIN-TIP)?

HSIN Texas Infrastructure Protection (HSIN-TIP) is a web-based, Sensitive But Unclassified (SBU) information sharing platform intended to connect all Infrastructure Protection mission partners in the State of

HSIN-TIP:

- Improves situational awareness.
- Facilitates collaboration between public and private sectors.
- Connects partners to both Statecentric and nationwide Infrastructure Protection resources.
- Connects users to HSIN-CS where they can get Sector-specific CIP information from a National perspective.

 - Dallas PD Fusion Center (MOSAIC)
 - El Paso PD Fusion Center (MATRIX)
 - Houston Regional Intelligence Service Center
 - North Central Texas Fusion Center
 - Southwest Texas Fusion Center
 - Texas Fusion Center
- A Threat Liaison Officer (TLO) is anyone working closely within the public safety/homeland security community who has been through an approved fusion center liaison officer training

Threat Liaison Officer Program (In Development)

- Program will provide participants an effective means of sharing information related to local and regional criminal threats, suspicious activity, and large scale incidents.
- This program will integrate participants into a statewide system
 of resources through a process of combining local fire and law
 enforcement agencies, emergency management, federal and
 state partners, and key private organizations into an effective
 and sustainable two-way flow of information

Threat Liaison Officer Program (In Development)

- Facilitate the exchange of information between TxFC and stakeholders within our area of responsibility
- Benefits of a robust, multidisciplinary TLO program
 - Improve the quality and efficiency of information exchange between TxFC, local first responder communities and national level intelligence/law enforcement agencies
 - Increase awareness of terrorism and criminal indicators, in accordance with applicable privacy and civil rights/civil liberties
 - Increase opportunities to detect, deter, and prevent crime and terrorist threats
 - Increase participation in TxFC activities for non-law enforcement partners
 - Develop a network of subject-matter experts (SME)

Suspicious Activity Report

- Participants in Nationwide SAR Initiative

www.iwatchTX.org

Benefits of TrapWire in the Fusion Center

- Access to a predictive analysis system designed to detect patterns of terrorist preattack surveillance and logistical planning before an attack
- Unique capacity to compare suspicious activity reporting with other major threat areas in America and abroad, to include Los Angeles, Las Vegas, London, and New York for greater situational awareness and information sharing
- A training program which will allow fusion center personnel to be better prepared to collect, analyze and interpret suspicious activity. This enhanced capability will allow TxFC personnel to better detect warning of pending attack/threat and notify the appropriate officials in order to prevent major crimes and acts of terrorism
- An interactive and intuitive on-line reporting method for community members (public) and other collectors (LE Private Sector) to report suspicious activity to TxFC

Suspicious Activity Reporting: Indicators and Behaviors

Behaviors	Descriptions
Potential Criminal or No	ncriminal Activities Requiring Additional Information During Investigations
	Questioning individuals at a level beyond mere curiosity about particular facets of a facility's or building's purpose, operations,
Eliciting Information	security procedures, etc., that would arouse suspicion in a reasonable person.
Testing of Security	Interactions with or challenges to installations, personnel, or systems that reveal physical personnel or cybersecurity capabilities
Recruiting	Building operations teams and contacts, personnel data, banking data, or travel data.
	Taking pictures or video of facilities, buildings, or infrastructure in a manner that would arouse suspicion in a reasonable person.
	Examples include taking pictures or video of infrequesntly used access points, personnel performing security functions (patrols,
	badge/vehicle checking), security-related equipment (perimeter fencing, security cameras), etc. All reporting on photography should
Photography	be done within the totality of the circumstances.
	Demonstrating unusual interest in facilities, buildings, or infrastructure beyond mere casual or professional (e.g., engineers) interest
	such that a reasonable person would consider the activity suspicious. Examples include observation through binoculars, taking notes,
Observation/Surveillance	attempting to measure distances, etc.
	Acquistion of unusual quantities of percursor materials such as cell phones, pagers, fuel, and timers, such that a reasonable person
Material Acquisition/Storage	would suspect possible criminal activity.
	Attempts to obtain or conduct training in security concepts (military weapons or tactics) or other unusual capabilities that would
Acquistion of Expertise	arouse suspicion in a reasonable person.
Weapons Discovery	Discovery of unusual amounts of weapons or explosives that would arouse suspicion in a reasonable person.
	Actions associated with a characteristic of unique concern to specific sectors (such as the public health sector) with regard to their
Sector-Specific Incident	personnel, facilities, systems, or functions
Defined Criminal Activity	y and Potential Terrorism Nexus Activity
	Unathorized personnel attempting to enter or actually entering a restricted area or protected site. Impersonation of authorized
Breach/Attempted Intrusion	personnel (e.g., police/security, janitor).
	Presenting false or misusing insignia, documents, and/or identification to misrepresent one's affiliation to cover possible illicit
Misrepresentation	activity.
	Stealing or diverting soemthing associated with a facility/infrastructure (e.g., badges, uniforms, identification, emergency vehicles,
Theft/Loss/Diversion	technology, or documents [classified or unclassified] which are proprietary to the facility).
Sabotage/Tampering/Vandalisn	Damaging, manipulating, or defacing part of a facility/infrastructure or protected site.
Cyberattack	Compromising or attempting to compromise or disrupt an organization's information technology infrastructure.
Expressed or Implied Threat	Communicating a spoken or written threat to damage or compromise a facility/infrastructure.
	Operation of an aircraft in a manner that reasonably may be interpreted as suspicious or posing a threat to people or property. May or
Aviation Activity	may not be in violation of Federal Aviation Regulations.

Suspicious Activity Report

- What information should be included when documenting a suspicious activity?
 - It is important to include all information obtained so that the full context of the incident is apparent to anyone who reviews the report. This includes detailed descriptions of people, vehicles, facilities, etc. It is also important to include your or complainant's information (name, phone number, etc.) if available.
- When completing a suspicious activity report (SAR), individuals must remember the following:
 - The information for the SAR must be legally obtained
 - The information submitted must be relevant to the identification of the subject or the subject's criminal conduct or activity.
 - The information gathered cannot be based solely on the political, religious, or social views, associations, or activities of any individual or any group.

Report Line Officer Training

Online SAR Training for Law Enforcement and Hometown Security Partners

The NSI training strategy is a multifaceted approach designed to increase the effectiveness of state, local, and tribal law enforcement and public safety professionals and other frontline partners in identifying, reporting, evaluating, and sharing pre-incident terrorism indicators to prevent acts of terrorism. To increase the effectiveness of this multifaceted approach, the NSI has developed training programs for frontline officers and hometown security partners regarding documented and verified behaviors and indicators that, when viewed in the totality of circumstances, may indicate terrorism-related criminal activity. Both the SAR Line Officer Training and each sector-specific SAR Hometown Security Partners Training discuss how to report identified suspicious activity to the proper authorities while maintaining the protection of citizens' privacy, civil rights, and civil liberties.

Details

(FOUO) Two men posing as members of the Cherokee Nation are employing a charity ruse to steal large amounts of copper and other scrap metal from companies and utilities in Texas. The activities of Michael George, aka "Michael Littlebear," and Jim Costa, aka "Joe Wolf," have been reported most recently in Seattle, Washington and Lewiston, Maine, where they have previously been arrested with stolen metals and Native American trinkets used in their theft scheme. i ii iii ivv Reporting indicates that the two men, both of whom have ties to the Dallas/Fort Worth region, are now operating the scheme in Texas in search of copper and scrap metal in general.

(U) Anyone who encounters these two individuals is encouraged not to cooperate, to call police and also to report the matter to the Texas Fusion Center via www.iwatchtx.org. Law enforcement officers who encounter these individuals are encouraged to promptly investigate further for evidence of metal theft.
