JUNE 2009
PCN 180 003000 00

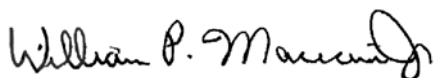

DEPARTMENT OF THE NAVY
Headquarters, U.S. Marine Corps
Washington, DC 20380-0001

30 JUNE 2009

1. This Technical Manual (TM), authenticated for Marine Corps use and effective upon receipt, provides operation and maintenance levels as determined by TM 11275-15/3D for Principal Technical Characteristics of U.S. Marine Corps Engineer Equipment.
2. Safety issues related to the information contained in this manual should be reported to the Marine Corps Systems Command Safety Office at MCSCSafety@usmc.mil. All significant safety hazards that have the potential to affect other commands and require widespread dissemination shall be reported via a Hazard Report per MCO P5102.1B.
3. Submit notice of discrepancies or suggested changes on a NAVMC 10772. Users with CAC/PKI certificates may submit the NAVMC via the internet using website <https://pubs.ala.usmc.mil/navmc/default.asp>. You can then fill in and submit the automated NAVMC 10772 Form. NAVMC forms may also be submitted by electronic mail to SMB.LOG.Tech.Pubs.fct@usmc.mil or mailing a paper copy of the NAVMC 10772 in an envelope addressed to Commander, Marine Corps Systems Command, Attn: Assistant Commander Acquisition and Logistics (AC LCL/TP), 814 Radford Blvd, Room 306E, Albany, Georgia 31704-0343. In addition to electronic submittal of the NAVMC form via the above web links, forward an informational copy (cc:) or mail a paper copy to the Project Officer at the following address: COMMANDER, MARCORSYSCOM, 2200 Lester Street, Quantico VA 22134, ATTN: GTES PMM 152. Problems or questions regarding the NAVMC 10772 program should be reported by calling commercial phone number (229) 639- or DSN 567 and any of the following extensions 5017, 6439, or 6035.
4. TM 11275-15/3C of 30 September 1991 is hereby superseded for Marine Corps use.

BY DIRECTION OF THE COMMANDANT OF THE MARINE CORPS

CHAPTER 1 INTRODUCTION 1-1

CHAPTER 2 EQUIPMENT DESCRIPTION SHEETS 2-1

CHAPTER 3 EQUIPMENT LISTINGS BY TAM-NUMBER SEQUENCE 3-1

CHAPTER 4 OBSOLETE EQUIPMENT 4-1

CHAPTER 1
INTRODUCTION

1-1. SCOPE.

This manual provides easy-to-use reference data for the more common items of Marine Corps engineer equipment. The equipment description sheets (Chapter 2), which make up the bulk of the manual, provides the operating and shipping characteristics of the equipment, including, when applicable, fuel and power requirements, power outputs, and major components. If available, photographs or drawings of the equipment are provided. For complete data on any item, refer to the appropriate technical manual or Stock List (SL-3 or SL-4). Stock Lists can be accessed on the internet through the MATCOM website <http://mcsd4.ala.usmc.mil/MCSD/SL/>. For additional assistance contact Action Officer at GTES-ES, phone number: **703-432-3728**.

1-2. GENERAL ARRANGEMENT.

a. **Introduction** (Chapter 1). This chapter contains general information about the publication and its use.

b. **Equipment Description Sheets** (Chapter 2). This chapter contains equipment description sheets arranged in alphanumeric table of Authorized Materiel Control Number (TAMCN) sequence. Each sheet provides key operating and shipping characteristics of the equipment and includes illustrations or drawings as appropriate. Some equipment items have multiple operating configurations. Those are marked as "varies" under Operating and Shipping Data.

c. **Equipment Listing by TAMCN** (Chapter 3). This chapter is a listing arranged in alphanumeric TAMCN sequence. The listing provides Table of Authorized Materiel Control Number (TAMCN), equipment Item Designator (ID) number, equipment nomenclature, and a page number reference to the equipment description sheet in Chapter 2. It should be noted that some TAMCN are common to more than one item of equipment.

1-3. EQUIPMENT DESCRIPTION SHEET FORMAT.

Each end item is given a separate data page. Data provided is self-explanatory. Some special instructions on the use of the data pages are provided below:

a. **Square Stowage/Cubic Measure Entries.** The term "square stowage/cubic measure" is used in this manual to indicate the floor or deck area, in square feet/cubic feet, required by an item. Square stowage/cubic measure figures are most useful for those items, which cannot be stacked; however, this manual provides square stowage/cubic measure information on most items, including those that can be stacked. Square stowage/cubic measure figures shown in this manual are rounded off to the nearest tenth. They do not include factors for additional space that may be required for maneuvering or tiedown.

b. **Containers for Sets and Kits.** Many sets or kits of tools, accessories, and expendable supplies listed in this manual are issued without containers. Since containers may be constructed to suit the particular needs of the unit, dimensions and weights of the carrying case/chest for such sets and kits will be included, if available. No operating data is provided since the tools, while in use, can be greatly dispersed.

1-4. OBSOLETE EQUIPMENT LIST.

This list contains obsolete equipment arranged in TAMCN sequences.

1-5. LIST OF ABBREVIATIONS/ACRONYMS.

The following abbreviations are used:

<u>Abbreviation/Acronym</u>	<u>Definition</u>
AAV	Assault Amphibian Vehicle
A/C	Air Conditioner
BTU	British Thermal Unit

DESCRIPTION AND FUNCTION

The Air Conditioner, Marine Corps Standard (MCS), Horizontal, 60 Hz, 0.75-Ton unit is a horizontally-mounted air conditioner driven by an air-cooled motor and designed for use in shelters, vans, and trailers in mobile, portable, and transportable applications. The unit provides complete environmental air conditioning including cooling, heating, ventilation, dehumidification, and filtering and has a nominal cooling capacity of 9,000 BTU and a nominal heating capacity of 7,000 BTU.

DESCRIPTION AND FUNCTION

The Air Conditioner, 1.5-Ton, 18,000 BTU/hr, is an electric motor driven ECU. These units are capable of providing cooled, dehumidified, heated, and filtered air for supply to a shelter or van. The 1.5-Ton ECU is comprised of an electrical subsystem, a refrigeration subsystem and the structure, i.e., the cabinet and frame. The electrical subsystem is designed to accept 208VAC/3-Phase, 50/60 Hz input power. The 1.5-Ton ECU weighs approximately 245 pounds and is capable of providing 18,000 BTU of cooling and 13,400 BTU of heating. Low setting provides a minimum of 9,000 BTU of cooling and 7,000 BTU of heat.

DESCRIPTION AND FUNCTION

The Air Conditioner, Marine Corps Standard (MCS), Horizontal, 400 Hz, 1.5-Ton unit is a vertical air conditioner driven by an air-cooled motor and is used primarily in van-type enclosures for providing filtered, conditioned, cooled, or heated air, as required, to maintain service conditions necessary for the efficient operation of electronic equipment housed within the van. The unit provides complete environmental air conditioning including cooling, heating, ventilation, dehumidification, and filtering. The B0004 has a nominal cooling capacity of 18,000 BTU and a nominal heating capacity of 12,000 BTU.

DESCRIPTION AND FUNCTION

The Air Conditioner, 5-Ton, 60,000 BTU/hr, is a packaged system designed to operate in a portable field capacity, providing conditioned air to a shelter or van. The 5-Ton ECU is controlled with a built-in control box or remote controller and operates using 208VAC/3-Phase, 50/60 Hz power supplied by a generator or shore power via a power plug located on the ECU. The refrigerant system uses R-22 refrigerant and has a cooling capacity at 60 Hz of not less than 60,000 BTU/hr at 95°F ambient outside temperature. The heating system is furnished with a 37,000 BTU/hr resistive type heater in addition to fan heat.

DESCRIPTION AND FUNCTION

The Air Conditioner, rated for a capacity of 10-Ton, 120,000 BTU/hr, is a packaged system designed to operate in a portable field capacity, providing conditioned air to a shelter or van. The 10-Ton ECU is controlled with a built-in control box or remote controller and operates using 208VAC/3-Phase, 50/60 Hz power supplied by a generator or shore power via a power plug located on the ECU. The refrigerant system uses R-22 refrigerant and has a cooling capacity at 60 Hz of not less than 126,000 BTU/hr at 95°F ambient outside temperature. The heating system is furnished with a 47,000 BTU/hr resistive type heater in addition to fan heat. This is the same unit used for the ITEG, TAMCN B0018.

DESCRIPTION AND FUNCTION

The Air Conditioner, Marine Corps Standard (MCS), Vertical, Skid-Mounted, multi-powered input (MPI) (50/60 or 400 Hz), 1.5-Ton unit is compact, vertical, lightweight, electrically powered air conditioner. A new concept is incorporated into the unit whereby components are packaged in a ruggedized frame and cabinet to allow transport without crating. It is not intended for support of electromagnetic interference sensitive equipment. The unit provides complete environmental air conditioning including cooling, heating, ventilation, dehumidification, and filtering and has a nominal cooling capacity of 18,000 BTU and a nominal heating capacity of 12,000 BTU.

DESCRIPTION AND FUNCTION

The Air Conditioner, 3-Ton, 36,000 BTU/hr, is a packaged system designed to operate in a portable field capacity, providing conditioned air to a shelter or van. The 3-Ton ECU is controlled with a built-in control box or remote controller and operates using 208VAC/3-Phase, 50/60 Hz power supplied by a generator or shore power via a power plug located on the ECU. The refrigerant system uses R-22 refrigerant and has a cooling capacity at 60 Hz of not less than 36,000 BTU/hr at 95°F ambient outside temperature. The heating system is furnished with a 31,000 BTU/hr resistive type heater in addition to fan heat.

TAMCN: B0016**

<i>National Stock Number/ID Number</i>	
6115-01-431-3062	11559A

DESCRIPTION AND FUNCTION

The Auxiliary Power Unit (APU), MEP-903A, is a self-contained, slide frame mounted, portable unit. It is equipped with controls, instruments and accessories necessary for operation. The generator set consists of a diesel engine, direct drive AC alternator, speed governing system, fuel system, 24 Vdc auxiliary cold weather starting system (23°F or below), and generator control system. The unit has redundant local and remote controls, self bleeding fuel system for vehicle or remote fuel tank interconnections. The generator set is designed to be used with the Standard Integrated Command Post System (SICPS) and the Warfighter Information Network - Tactical Shelters. Climatic condition range of -32°F to 120°F.

**INTEGRATED TRAILER-ECU-GENERATOR (ITEG)
TAMCN: B0018**

National Stock Number/ID Number	
2330-01-556-9648	11490A

DESCRIPTION AND FUNCTION

The Integrated Trailer-Environmental Control Unit (ECU), Generator (ITEG) is an integrated HMMWV-towable unit that is designed to support highly mobile command and control systems and other forward-deployed operations centers and activities that displace often and have limited access to external power sources. The generator produces 22 kW of electrical power (maximum of 9 kW for external use) and can parallel with other GET units and the MEP-805B Tactical Quiet Generator. The ECU provides complete environmental air conditioning including cooling, heating, ventilation, and filtering and has a nominal cooling capacity of 120,000 BTU and a nominal heating capacity of 47,000 BTU. The integral trailer is based on the standard M1102 trailer chassis designed with high ground clearance and run flat tires.

TECHNICAL DESCRIPTION

Unit

Manufacturer: GDC4S
Model: GET Spiral 1

Generator

Frequency (Hz): 60
Voltage/Phase: 208VAC/3-Phase

TRAILER-MOUNTED HYDROSEEDER
TAMCN: B0025

TC-202

<i>National Stock Number/ID Number</i>	
3710-01-535-7449	11241A

DESCRIPTION AND FUNCTION

The T-90 Hydroseeder is a trailer-mounted machine that provides dust control on helipads, airfields, lines of communications, and base camps. Dust palliatives are loaded into the palliative tank either full strength or diluted with water. When diluted, the mixture is kept in suspension by a hydraulically powered agitator and recirculation system.

**MEPDIS-REPLACEMENT, POWER DISTRIBUTION BOX, INDOOR MODEL,
5 KW, GFCI PROTECTED
TAMCN: B0027**

<i>National Stock Number/ID Number</i>	
6110-01-532-1794	11185A

DESCRIPTION AND FUNCTION

The 5 kW GFCI protected, Indoor model, Power Distribution Box is part of the Mobile Electric Power Distribution-Replacement (MEPDIS-R) system. MEPDIS-R is designed to provide electrical power distribution in a field environment. The MEPDIS-R system provides a flexible, modular, recoverable, safe power distribution capability that can be quickly emplaced and recovered for later reuse. The 5 kW Indoor Power Distribution Box provides 18 GFCI-protected single-phase 15A receptacles to power tent lighting or other equipment. It is designed to be deployed in a tent or sheltered environment.

DESCRIPTION AND FUNCTION

The 5 kW Non-GFCI protected, outdoor model Power Distribution Box is part of the Mobile Electric Power Distribution-Replacement (MEPDIS-R) system. MEPDIS-R is designed to provide electrical power distribution in a field environment. The MEPDIS-R system provides a flexible, modular, recoverable, safe power distribution capability that can be quickly emplaced and recovered for later reuse. The 5 kW Outdoor Power Distribution Box provides (6) 20A and (3) 30A single phase pin and sleeve connectors for its associated output cord sets. The output cords each provide (4) 15A receptacles to power tent lighting, conveniences, or other equipment.

DESCRIPTION AND FUNCTION

The All Terrain Crane (ATC) is a rubber tired, hydraulic boom, all terrain crane capable of lifting and swinging a maximum of 80,000 pounds. The ATC will support construction and materiel handling tasks, as well as, loading and unloading supplies and equipment. It will be used to load/unload break bulk cargo from a fixed port or pier; on and off airfield runways; and over unprepared and uneven surfaces. It will also be capable of being driven over primary and secondary highways to include sand, snow, and mud. The ATC is fielded with a set of lifting slings. The lifting capacity of these slings is 40-Ton.

DESCRIPTION AND FUNCTION

The Field Expeditionary Bath Shower unit consists of six separate but identical and interchangeable shower modules, with interconnecting hoses, electric feed water and drain pumps, and a drain hose. The M-80 Water Heater supplied with the unit is a self-contained, oil-fired boiler capable of providing 120°F water at 18-GPM. Each module consists of a fiberglass base, a top frame, six vertical supports, a cover, and two-shower heads. The individual modules can be connected together in any quantity desired.

JOINT ASSAULT BRIDGE (JAB)
TAMCN: B0057

TC-232

<i>National Stock Number/ID Number</i>	
5420-01-545-7365	11374A

DESCRIPTION AND FUNCTION

The Joint Assault Bridge (JAB) is a full-tracked armored engineer vehicle designed to improve the mobility, maintainability, and survivability of the Marine Air Ground Task Force (MAGTF) and Army Mobility Augmentation Company (MAC) providing the rapid assault bridging of wet and dry gaps and complex obstacles, up to 60 ft (18.29 m) in length.

The JAB consists of an M1A1 Abrams Main Battle Tank using an A2 suspension, a hybrid bridge launching mechanism, the modified BR90 Bridge Launcher, mounted on the M1A1 hull, a newly designed High Pressure Hydraulic System (HPHS) and the existing MLC-70 AVLB Scissors Bridge. Additional GFE includes the AN/VRC-103 Radio System, Defense Advanced GPS Receiver (DAGR), AN/VIC-3 Intercommunications Suite, Embedded Diagnostics system and Smoke Grenade Launcher. The USMC variant will include a JAB Dozer Blade.

Transportability

The JAB is required to be shipped by land (tractor trailer, rail), sea (ships (Navy and Sealift), LCAC and lighters) and air. The following ships LHA 1, LHD 1, LPD 4 and 7, LPD 17, LSD 41, and LSD 49 classes, LMSRs, RO/RO, LCUs, LCACs and lighters used for LOTS. Based on MIL-STD-1366 Table 25 the C-5 and C-17 would be the potential aircraft for transport.

MEDIUM CRAWLER TRACTOR (MCT)

TAMCN: B0060

TC-315

National Stock Number/ID Number	
2320-01-558-5671	11503A

DESCRIPTION AND FUNCTION

The Medium Crawler Tractor (MCT) is a diesel-engine driven, COTS, militarized crawler type, medium-drawbar pull tractor. The tractor is equipped with Roll Over Protection Structure (ROPS) and Falling Objects Protective Structure (FOPS), hydraulically powered semi-U (straight) type blade with a minimum drawbar pull of 35,000 pounds. The tractor is equipped with all components necessary to enable the tractor to function the following attachments: a 3-shank ripper or a rear-mounted winch and drawbar/towing coupler.

LINEMAN'S TOOL KIT
TAMCN: B0062

National Stock Number/ID Number	
5180-01-550-0145	11509A

DESCRIPTION AND FUNCTION

The Tool Kit, Lineman's is a standardized lineman's basic tool kit that provides a wide range of necessary tools for the basic electrician. The Tool Kit, Lineman's will enable Marines at the organizational level in Military Occupational Specialty (MOS) 1141, to install, operate and maintain heating equipment, mobile electric power generating sources, electrical distributions systems and repair of telephone/telegraph wire. The tools in the Tool Kit, Lineman's are warranted for life and are configuration-controlled.

TAMCN: B0069**

TC-321

National Stock Number/ID Number	
5180-01-550-8373	11418A

DESCRIPTION AND FUNCTION

The Climber's Set, Tree and Pole, Model TK-1141/C, provides climbing equipment which allows the Line-man to ascend poles or trees and secure himself without the aid of a ladder. This permits freedom of the hands while working aloft. The set also contains tools for hoisting needed items from ground level, as well as required personal protective equipment. The set consists of a case, three trays of equipment, and equipment stored in the bottom of the case. Trays are numbered 1 through 3 starting with the top tray.

120M MOTORIZED ROAD GRADER
TAMCN: B0078

TC-511

National Stock Number/ID Number	
3805-01-566-0558	11621A

DESCRIPTION AND FUNCTION

The 120M Motorized Road Grader is a self-propelled grading machine powered by a diesel engine. It has rubber tires, six-wheel drive, and an articulated frame with front-wheel steer design. It is equipped with a 12' blade with a minimum shoulder reach of 6' outside the wheels and has a minimum lift above ground of 16". It is reconfigurable to accept an armored cab. The advanced joystick control system replaces the traditional array of levers and steering wheel, which greatly simplifies motor grader operation by placing total machine, drawbar, and moldboard control into both of the operator's hands. Applications of the 120M include grading coarse and fine soil, creating low and high bank slopes, flat and V-ditches, scarifying, removing snow, and building and maintaining roads and airfields.

DESCRIPTION AND FUNCTION

The Medium Girder Bridge (MGB) is a deck-type, two-girder bridge system providing a 4-meter wide roadway to span wet or dry gaps. The MGB is a lightweight, bridging system quickly erected by hand in various configurations and lengths with minimum site preparation. Bridges up to Military Load Class (MLC) 70 (tracked) or 100 (wheeled) can be constructed and dismantled quickly by trained Marine Corps Engineer units to keep pace with operations.

DESCRIPTION AND FUNCTION

The IRB, B0155, is a floating wet gap bridge system capable of carrying a Military Load Class (MLC) 80/100-Ton vehicle in stream currents of 10 fps (5.9 mph). The IRB consists of 12 interior and 5 ramp bays and is capable of breaking down into two MLC 80/100-Ton vehicle rafting sets. The Rafting Set, B1625, utilized as a ferry, is the preferred method of conducting wet gap crossings. The Rafting Set consists of 5 interior bays and 2 ramp bays.

DESCRIPTION AND FUNCTION

The Assault Breacher Vehicle (ABV) is based on the M1A1 chassis. Integrated subsystems include an armored turret, Full-Width Mine Plow (FWMP), Combat Dozer Blade (CDB), Linear Demolition Charge System (LDCS), Lane Marking System (LMS), Integrated Vision System (IVS), Thermal Weapon Sight (TWS), Vehicle Intercommunication Set (AN/VIC-3), AN/VRC-103 Radio System, Embedded Diagnostics (ED) System, Defense Advanced Global Positioning System (GPS) Receiver (DAGR), and a Weapon Platform Station (WPS). The inclusion of the Rapid Ordnance Removal System (RORS) and the Surface Mine Plow (SMP) as part of the Front End Equipment (FEE) will be addressed at a later date. The ABV is assigned to and employed by the Combat Engineer Battalion (CEB) as part of a synchronized operation to rapidly breach obstacles and create lanes for the MAGTF.

DESCRIPTION AND FUNCTION

The portable air compressor is a trailer mounted unit which will furnish compressed air at the rate of 260 CFM at a pressure of 100 psi. It is designed to run at its rated capacity under adverse conditions of heat, cold, rain and dust, and will operate pneumatic tools as well as provide compressed air for bridging and bulk fuel operations. The compressor is used by Combat Engineers Battalion, Engineer Support Battalion, Artillery Regiment, Ground Combat Support and Marine Aircraft Wing units. Pneumatic tools are components (SL-3 items) of the compressor unit.

**500 GALLON COLLAPSIBLE COATED-FABRIC POTABLE WATER DRUM
TAMCN: B0571**

TC-022

<i>National Stock Number/ID Number</i>	
8110-01-122-0015	08935A

DESCRIPTION AND FUNCTION

The 500 Gallon Collapsible Potable Water Drum is a durable non-vented, hermetically sealed, collapsible fabric container used to store and transport drinking water. It is cylindrical when filled to capacity. It is designed for use with the Forward Area Water Point Supply System FAWPSS (B0676, pg. 2-81). The drum is fitted with two 2-inch cam-lock type filler/discharge ports and may be folded for storage. Yoke, towing and lifting (TAMCN B2730, pg. 2-175) is required if the drum is to be towed or lifted. This equipment is associated with the FAWPSS (B0676, pg. 2-81).

TAMCN: B0579**

TC-343

National Stock Number/ID Number	
5985-00-471-0223	07500A

DESCRIPTION AND FUNCTION

The new 100 kW Load Bank is a modified COTS item that is being purchased to replace the aging legacy Load Bank/Dummy Load (TAMCN B0579). The Load Bank consists of a rugged, weather-proof enclosure containing banks of resistors that can be connected to a generator to simulate a load. They will be used outdoors throughout all theaters of operations by Marine Corps aviation and ground equipment maintenance units for preventive and corrective maintenance, exercise and testing of various size mobile tactical generators.

DESCRIPTION AND FUNCTION

The Dummy Load, Generator Set, 100kW provides electrical load simulating capabilities for maintenance and operational evaluation of mobile electrical power sources. It is a self-contained, air-cooled, skid-mounted unit, suitable for indoor and outdoor use. The unit contains all instruments, controls, and power loads for testing AC generators. The unit is capable of being trailer mounted.

M9 ACE ARMORED COMBAT EARTHMOVER
TAMCN: B0589

TC-344

National Stock Number/ID Number	
2350-00-808-7100	09599A

DESCRIPTION AND FUNCTION

The M9 ACE is a tracked, highly mobile, armored earthmover capable of supporting the maneuver element in offensive and defensive operations. It accomplishes critical combat engineer tasks such as preparing hull defilade fighting positions for guns and tanks, and preparing protected positions for other critical battlefield systems to increase their survivability. The M9 ACE will prepare combat roads, remove roadblocks and other obstacles, and prepare access routes at water obstacles. It also performs countermobility tasks such as preparing antitank ditches. The M9 ACE requires a single operator and can attain a speed of 30 mph on land. The system is configured for on and off-loading in C130 and C5 aircraft.

COMPRESSED AIR FOAM SYSTEM-MOBILE (CAFS-M)

TAMCN: B0625

TC-039

National Stock Number/ID Number	
4210-01-468-3460	10671A

DESCRIPTION AND FUNCTION

The Compressed Air Foam System-Mobile (CAFS-M) is comprised of a compressed air foam fire extinguishing assembly mounted in the bed of a M1097A2 High Mobility, Multi-purpose, Wheeled Vehicle (HMMWV). This combination provides a mobile platform for the transportation of firefighting personnel and fire extinguishing equipment. The system produces foam (class A foams for structural; class B foams for fuel) by using a combination of water mixed with a concentrated foaming agent, which is then combined with compressed air to make with varying consistencies. The foam consistency can be adjusted for suppression of class A to class B fires.

FIRE SUPPRESSION SYSTEM (FSS)
TAMCN: B0626

TC-040

National Stock Number/ID Number	
4210-01-494-4642	10840A

DESCRIPTION AND FUNCTION

The Fire Suppression System (FSS) is comprised of a twin agent fire extinguishing assembly mounted inside the bed of a M1097A2 High Mobility Multi-Purpose Wheeled Vehicle (HMMWV). The system consist of 80-gallons of pre-mixed Aqueous Film Forming Foam (AFFF) and 200 pounds of dry chemical (Potassium Bicarbonate), both fire suppressants are expelled by compressed gas through a twinned hand line and a single nozzle. The FSS's mission is to provide fire suppression and fire fighting capability for class A and B type fires in support of bulk fuel storage sites, Ammunition Supply Points (ASP), and base camp operations, and Forward Arming and Refueling Point (FARP) missions.

DESCRIPTION AND FUNCTION

The Floodlight Set (FLS) is a self-contained system with a power plant capable of providing up to five acres of 360 degree general illumination and security use. It can also provide accessory power with at least 12 hours of continuous operation. It has a primary tower with three mast-mounted lights and tripod-mounted ground lights that are capable of continuous field deployment in a wide variety of environmental extremes and rough terrain. For flexibility, the set is configured so that it can be mounted on the USMC M116A3 and LTT-MCC trailers.

TAMCN: B0675

TC-043

National Stock Number/ID Number	
4930-01-094-0026	07391B

DESCRIPTION AND FUNCTION

The primary purpose of the Tactical Airfield Fuel Dispensing is used for receiving, storing, and dispensing aviation fuel in support of expeditionary airfields. With the single fuel on the battlefield concept, the system will be able to supply fuel to both aviation and ground assets. The system has a storage capacity of 320,000-gallons and a pump capability up to 600 GPM. The system has 12 aircraft dispensing points for a multi-aircraft refueling capability and a capability to receive fuel from multiple sources.

DESCRIPTION AND FUNCTION

The Forward Area Water Point Supply System (FAWPSS) is an expedient, self-contained potable water storage and dispensing system. It consists of a 150 GPM pump, hoses, 500-gallon, collapsible coated-fabric water drum, and ancillary components necessary to establish four distribution points. The FAWPSS is used in conjunction with the 500-gallon, collapsible coated-fabric water drum (TAMCN B0571, 2-66).

TACTICAL PETROLEUM LABORATORY, MEDIUM
TAMCN: B0695

TC-046

National Stock Number/ID Number	
6640-01-399-0483	10188A

DESCRIPTION AND FUNCTION

The Tactical Petroleum Laboratory, Medium (TPLM) provides those essential testing components integrated in an ISO shelter to monitor the critical physical and chemical characteristics of aviation and ground fuels. Military and commercial fuels (to include captured fuels) can be tested for composition and quality against minimum standards as specified in MIL-STD-3004A, Quality Surveillance for Fuels, Lubricants and related products. The TPLM also serves as the primary source for monthly correlation testing for filter effectiveness in support of the Marine Wing Support Squadrons. Operational and ancillary equipment include the Air Conditioner, 36,000 BTU, Vertical, b0013; Air Conditioner Skid Assembly, B2006 and 30 kW TQG, B0953/B0971.

DESCRIPTION AND FUNCTION

The 3 kW Generator Set, MEP-831A, is a self-contained, skid mounted, portable unit. It is equipped with controls, instruments and accessories necessary for operation. The generator set consists of a diesel engine, permanent magnet A/C generator, control box assembly, output/load panel, primary and auxiliary fuel systems, enclosure cooling and ventilation system, engine exhaust assembly, and a 24 Vdc battery. The generator set is designed to be used with any equipment requiring a small source of A/C power and operates in a "Hot and Basic" climatic condition range of -25°F to 120°F. The generator set is portable and requires a six-person lift.

TECHNICAL DESCRIPTION

Generator Set

Manufacturer: Fermont
 Model: MEP-831A

TAMCN: B1045**

TC-290-2

<i>National Stock Number/ID Number</i>	
6115-00-133-9101	07464A

DESCRIPTION AND FUNCTION

The Generator Set, Diesel Engine Driven, Skid Mounted, 100 kW, MEP-007A, is a self-contained, transportable source of A/C power. A 100 kW synchronous, brushless generator is directly powered by a six-cylinder, water-cooled, four-cycle, turbocharged diesel engine. Both the engine and generator are mounted on a welded I-beam skid base and contained within a steel-paneled housing enclosure. The generator set is provided with the controls, instruments, and accessories necessary for its operation, monitoring, and control. The generator set is designed to be used with any piece of equipment requiring a large source of external A/C power and operates in a "Hot and Basic" climatic condition range of -25°F to 125°F.

TECHNICAL DESCRIPTION

Generator Set

Manufacturer: Consolidated Diesel Electric Co
 Model: MEP-007A
 Volts: 120/208/240/416
 Frequency (Hz): 60
 Speed (RPM): 2,400
 Phase: 3

Fuel

Fuel Capacity: 90 gal.
 Fuel Consumption: 6 gph
 Fuel Requirement: Diesel/JP-8

Dimensions

Length (in.): 106

DESCRIPTION AND FUNCTION

The 100 kW Generator Set, MEP-807A, is a fully enclosed, self-contained, skid-mounted, portable unit. It is equipped with controls, instruments, and accessories necessary for operation as a single unit or in parallel with another unit of the same class and mode. The generator set consists of a diesel engine, brushless generator, excitation system, speed governing system, fuel system, 24 Vdc starting system, control system, fault system, and Electronic Modular Control Panel (EMCP). The generator set is designed to be used with any piece of equipment requiring a large source of A/C power and operates in a "Hot and Basic" climatic condition range of -25°F to 120°F.

DESCRIPTION AND FUNCTION

The Motorized Road Grader is a self-propelled grading machine powered by a diesel engine. It is rubber-tired, four-wheel drive, and has an articulated frame and front-wheel steer design. The primary use is for building and maintaining roads and airfields. The fuel capacity is 75 gal. (284 L) with a maximum travel speed of 24.5 mph (39.4 kph).

HELICOPTER EXPEDIANT REFUELING SYSTEM (HERS)

<i>National Stock Number/ID Number</i>	
4930-01-114-9930	07387C

DESCRIPTION AND FUNCTION

The Helicopter Expedient Refueling System is designed for support of helicopter refueling operations in forward areas and remote sites. It is normally used in Forward Arming and Refueling Point (FARP) operations. Versatility, easily transportable, and quick setup are the key elements of the system. The HERS has a maximum capacity of 18,000-gallons with 500-gallon bladders and 3,000-gallon collapsible tanks and a pumping capability of 150 GPM. It may be deployed as a whole, in part, or with other tactical fuel systems.

**HOSE REEL SYSTEM
TAMCN: B1139**

TC-056

National Stock Number/ID Number	
4930-01-462-1304	10596A

DESCRIPTION AND FUNCTION

The Hose Reel System (HRS) provides bulk fuel transfer capability within the Marine Air-Ground Task Force (MAGTF). Each system has a total of five miles of 6-inch lay-flat lightweight fuel hose on eleven hose reels (each reel contains 2,400 foot or four sections of 6-inch by 600-foot lay-flat lightweight fuel hose). The HRS system consists of two base units, two power units, eleven hose reels, and ancillary components necessary to interconnect to the other tactical fuel systems. The HRS has a manual deployment capability of 5 mph and a powered deployment and retrieval capability of 2 to 2.5 mph.

**MK 2 MOD 0 MINE CLEARANCE SYSTEM TRAILER MOUNTED
TAMCN: B1298**

TC-506

National Stock Number/ID Number	
1055-01-281-2770	09153A

DESCRIPTION AND FUNCTION

The MK 155 MOD 0/1 is a hydraulically elevated launch rail and container frame for the M58 Linear Demolition Charge (LDC). It mounts to the M353 general purpose trailer chassis. This mobility allows it to provide the only responsive, explosive minefield/obstacle clearing capability in the Marine Corps inventory. The system is operated from inside the host vehicle thus protecting the operators from direct and indirect fires during employment. The M58 Linear Demolition Charge will breach a lane approximately 8 m wide by 100 m long. When combined with the M353 or M200 trailer chassis, and M58/68 line charge and MK22 rocket, the MK 155 becomes the MK 2 MOD 0 Mine Clearance System. (M68 is the inert round).

MK 1 MOD MINE CLEARANCE SYSTEM
TAMCN: B1315

National Stock Number/ID Number	
1055-01-226-6338	09962A

DESCRIPTION AND FUNCTION

The MK 154 Mine Clearance Launcher is a hydraulically elevated launch rail and container frame for three (3) M59 Linear Demolition Charges. This kit is easily installed in an AAVP7A1 when required, and removed when not needed. The MK154 launcher provides the only mobile, multiple shot, explosive minefield clearance capability in the U.S. inventory. The system has the capability to launch from the water and employ against Shallow Water Mines (SWM) and continue inland. Operators deploy the line charges from inside the AAV, thus offering them protection from direct and indirect fires. The kit has the potential to clear one 8 x 300 m lane or three 8 x 100 m lanes, when all charges are deployed. When combined with the AAV, three M59/69 line charges and three MK 22 rockets, the system becomes the MK 1 MOD 0 Mine Clearance System.

DESCRIPTION AND FUNCTION

The Aviation Fuel Contamination Test Kit is a portable petroleum quality surveillance kit consisting of components and testing equipment capable of determining contamination levels in aviation fuels. The kit has the capability to take in-line samples in tactical fuel systems, mobile refueling equipment, and commercial refueling equipment. The kit can test for specific gravity, free-water, and particulate contamination in aviation fuel samples. The Aviation Fuel Contamination Test Kit is associated with the (TAMCN B0675, pg. 2-80) Tactical Airfield Fuel Dispensing System and (TAMCN B0685, pg. 2-82) Amphibious Assault Fuel System.

The 600 GPM Fuel Pump is designed specifically to transfer fuel, and is the primary pump within the (TAMCN B0675, pg. 2-80) Tactical Airfield Fuel Dispensing System and the (TAMCN B0685, pg. 2-82) Amphibious Assault Fuel System. It consists of a turbo-charged, four-cylinder diesel engine and a self-priming centrifugal pump mounted on a two-wheel frame assembly. The pump has an output volume of 600 GPM at 340 foot of head and a designed working pressure of 150 psi. It is an SL-3 component of AAFS and TAFDS.

**IMPROVED RIBBON BRIDGE RAFT SET RAMP BAY
TAMCN: B1625**

TC-346

National Stock Number/ID Number	
2090-01-316-2576	09439A

DESCRIPTION AND FUNCTION

The Improved Ribbon Bridge Raft Set, consists of two (2) ramp bays, five (5) interior bays and the necessary components to construct a 5-bay conventional floating raft, capable of carrying tracked/wheeled vehicles up to military load class (MLC) 80 in., and currents up to 8 fps. Shipping information includes a MK18 LVS rear body unit used to transport both types of bays. The raft can be launched from the transporter at the shoreline and a bridge erecting boat can help guide the raft. It is easily recovered, reloaded and refolded.

TAMCN: B1720**

TC-078

National Stock Number/ID Number	
5420-01-139-1503	08710A

DESCRIPTION AND FUNCTION

The Reinforcement Set consists of reinforcing links that are connected to form a pair of chains beneath each bridge girder. Links are connected to bottom panels at the ends of the bridge by reinforcing posts that enable the system to be tensioned as the posts are pulled towards a vertical position by cable jacks. The kit is manufactured in the same light alloy material as the bridge. It is used with the Medium Girder Bridge (MGB) (TAMCN B0152, pg. 2-50).

DESCRIPTION AND FUNCTION

The Scraper-Tractor is an open bowl, pneumatic-tired, 2-Axle, 14 to 18 cubic yard capacity, single diesel-powered, articulated frame-steer scraper. It is employed by engineer units in earthmoving operations in the main battle area. It can be used as an earthmover and extractor during road or airfield construction, construction of anti-armor ditches, weapon emplacements, and the hauling and employment of material for obstacles. It is not approved for transporting by air mode.

DESCRIPTION AND FUNCTION

The Shop Equipment, General Purpose Repair, Semitrailer Mounted (SEGPRSM) is a semitrailer mounted machinist van containing tools and equipment for use in maintenance and repair of mechanical equipment from 1st to 4th echelon. It contains a 10 KW MEP-803A generator or can be driven by alternate AC power source. The van requires input power of 208 volt, 3-phase, 60 Hz for operation. It has an air compressor, and capabilities include drilling, welding, grinding, valve grinding, and honing. It can be open-weather or self contained, including a personnel heater. It has expanding canopies, and frames and curtain assemblies so that an enclosed work area may be set up around the semitrailer.

DESCRIPTION AND FUNCTION

The Sweeper is truck mounted on a 32,000 pound Gross Vehicle Weight Ratio (GVWR) International 4300/DT 466 cab chassis with diesel engine and an automatic transmission. The optimal sweeping speed is 10 to 15 mph (16 to 24 km/h). The unit also comes equipped with a rear mounted, spring arm suspended vacuum hose to spot clean difficult to reach areas. The Sweeper will operate in dry and wet conditions. The Sweeper module includes a 115 hp (86 kW) diesel auxiliary engine, centrifugal fan, vacuum pick-up hood, dust separator, dust control system and a hydraulically tilting 8 cubic yard debris hopper. The Sweeper is equipped with dual steering, brake and accelerator controls for right and left-hand driving. It can also supply compressed air on demand. The Sweeper is designed to cleaning runways, expeditionary airfields, and other stabilized areas of debris that can cause foreign object damage (FOD) to aircraft.

BACKHOE LOADER (BHL)
TAMCN: B2483

TC-308

National Stock Number/ID Number	
3805-01-514-7166	10996A

DESCRIPTION AND FUNCTION

The Backhoe Loader (BHL) is a highly mobile, lightweight, rubber-tired tractor equipped with a front-end loader and backhoe excavator. It can maintain pace with other wheeled vehicles of the maneuver force and can reach road speeds in excess of 20 mph. The BHL has the capability to operate hydraulic power tools and can be externally transported by CH-53 helicopter.

DESCRIPTION AND FUNCTION

The TWPS (MC-TWPS) is a skid-mounted unit transportable by the Medium Tactical Vehicle Replacement (MTVR) truck (MK 23, MK 25) or by a 5-Ton forklift. The system includes the basic TWPS skid, 6,000-gallon water storage capability, and all BII, but does not include the power source (i.e. generator) or the extended capability modules. The system can be powered by a 60 kW, 416VAC high, WYE source. Five extended capability modules are purchased and deployed separately as required by their mission; (a) Ocean Intake Structure System, (b) Supplemental Cleaning, Waste and Storage, (c) Cold Weather, and (d) Nuclear Biological and Chemical (NBC) Treatment and (e) MBC Survivability.

TOWING AND LIFTING YOKE
TAMCN: B2730

TC-121

National Stock Number/ID Number	
8110-00-856-6243	04485B

DESCRIPTION AND FUNCTION

The Towing and Lifting Yoke provides the means for towing the Drum, Fabric, Collapsible, Liquid Fuel, 500 Gallon (TAMCN B0570) and the Drum, Fabric, Collapsible, Potable Water, 500 Gallon (TAMCN B0571) short distances and lifting them with power equipment or by helicopter. The yoke is collapsible and is constructed of two sections consisting of an upper leg, connecting leg, and brace. When assembled, the two sections connect at the braces with the upper leg forming an eye attaching to a shackle on each end of the drum.

TOOL KIT, INTERMEDIATE LEVEL ELECTRICIANS (L-LEVEL TOOL KIT)

TAMCN: B7900

TC-272

National Stock Number/ID Number	
5180-01-546-8026	11390A

DESCRIPTION AND FUNCTION

The I-Level Tool Kit is comprised of various hand tools and accessories to aid Marines in Military Occupational Specialty (MOS) 1141 to install and maintain interior wiring in fixed structures. The I-Level Tool Kit will come in a rugged/transportable case, and will include electrician's tools, testers, and meters contained within its own rugged/transportable case with foam inserts and molded plastic trays for tool storage and protection. These new modernized tools are configuration controlled. Refer to SL-3-11390A for complete listing and description of tools.

POWER DISTRIBUTION SYSTEM, FFSS BUS DUCT
TAMCN: C0200

TC-279

<i>National Stock Number/ID Number</i>	
6110-01-522-3067	11060A

DESCRIPTION AND FUNCTION

The Field Food Service System Bus Duct (FFSSBD) will allow for multiple configurations; two 60 kW, three 60 kW, one 100 kW, or two 100 kW, 120/208, 3-Phase, 60 Hz generators to power the Marine Rapid Deployment Kitchen (MRDK), Field Sanitation Unit (FSU), and Refrigerator Box (REEFER). Each FFSSBD is completely self-contained in a weather resistant enclosure and is capable of distributing power from generators configured for 120/208VAC. The FFSSBD is configured so that loads and/or generators may be safely added and removed without disrupting power. The FFSSBD does not automatically synchronize generator inputs. Synchronization must be accomplished by the generator sets.

LASERPLANE, LEVEL SYSTEM
TAMCN: J3087

TC-310

<i>National Stock Number/ID Number</i>	
3805-01-457-1962	81000B

DESCRIPTION AND FUNCTION

The Laserplane Level System is comprised of a Blade Pro, model MG2P351T/E and a Laserplane Dual Slope Transmitter Kit, Model 1145-2. The Blade-Pro System contains all of the required hardware for mounting the Blade-Pro System to the 130G Grader, TAMCN B1082. Installation kit, NSN 5860-01-278-8963 provides all the necessary cables, hoses, fittings, brackets, and fasteners required to move components from grader to grader. Also, the Terramodel ConstructionPak Software Package is an important part of the total system. The packages are a complete high performance 3D surface modeling solution for heavy and highway construction. ConstructionPak is a single software solution for quantity verifications, tracking of built earthwork quantities and performing total construction layout. The LLS system will increase grading productivity by cutting to grade in fewer passes, with consistent accuracy, at high operating speeds, day or night. DOD equipment operators have achieved typical production increases of 30 to 50 percent. This system has the ability to control cross slope; or the elevation of one or both sides of the blade by using a device called a Tracer. Operator selectable features and functions customize the system to meet particular job requirements. Proportional hydraulic control valves provide fast and smooth automatic control of the blade.

**SYNCHRONIZER BOX, GENERATOR, 20 kW, 60 Hz
TAMCN: NA**

TC-292

<i>National Stock Number/ID Number</i>	
6110-01-559-0584	8J908B

DESCRIPTION AND FUNCTION

The synchronizer box, Model MSB25, is a stand alone assembly designed to allow synchronous power transfer between two MMG25 generators, or between a single MMG25 generator and utility power, without disrupting and loads connected to the generator. This will allow the removal of the primary generator from the grid for service or extended maintenance. The MSB25 is capable of handling current up to 100 amperes of 120/208VAC, 60 Hz, 3-Phase power. It has two 5-Wire grounded input connections and a single 5-Wire grounded output connection. This is a special usage item managed by the Project Officer for Mobile Electric Power at PM EPS MARCORSYSCOM. Units desiring to use this item should contact PM EPS, MARCORSYSCOM.

Tactical Airfield Fuel Dispensing System (TAFDS)	2-80
Tactical Petroleum Laboratory, Medium	2-83
Tactical Water Purification System (TWPS)	2-167
Tank Farm Interconnection Set	
125 GPM Pump	2-141
350 GPM Pump	2-140
Accessory Kit	2-139
Dual Tank	2-133
Tank, Fabric, Collapsible, Potable Water, 20,000 Gallon	2-170
Tank, Fabric, Collapsible, Potable Water, 50,000 Gallon	2-169
Test Set, Soil	2-142
