Cyber Alert:

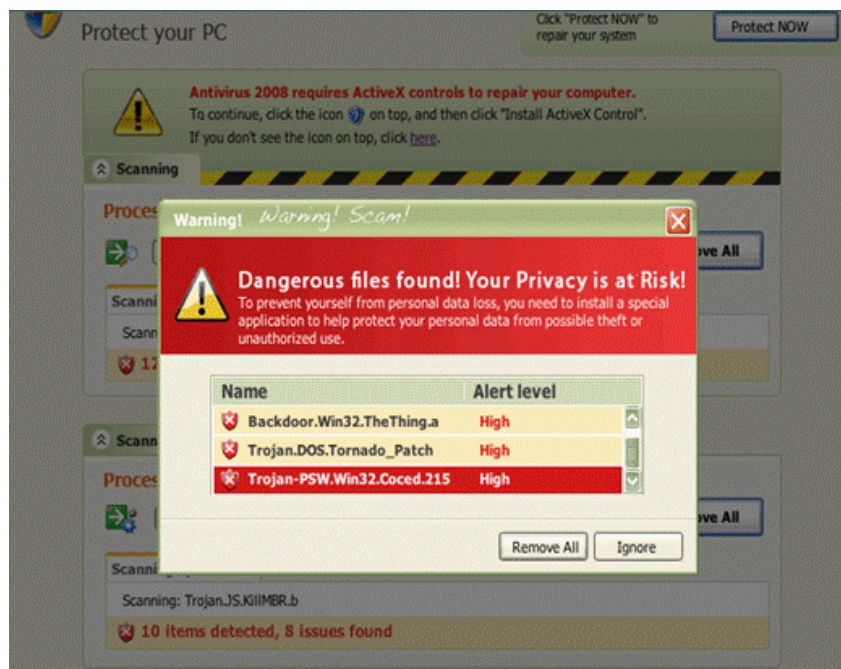

Fake Spyware and Anti-Virus Malware

Over the past few days, there has been an increase in computers infected with Fake spyware and anti-virus malware. These infestations produce a popup stating that your machine is infected with viruses and offer a way to remove them. The object of this software is to trick you into believing you have viruses that need to be removed. A scan will launch after you “click” anywhere on the message and will request payment for removal of the “viruses”.

Please advise your users to not click on any messages or buttons (not even the red X in the top right) if they see screens of this type.

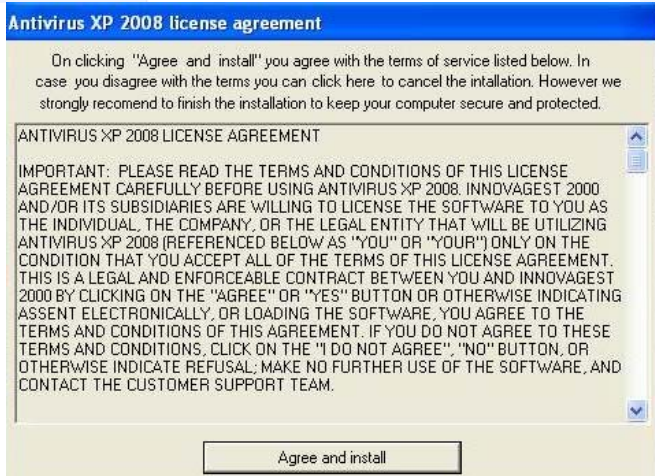

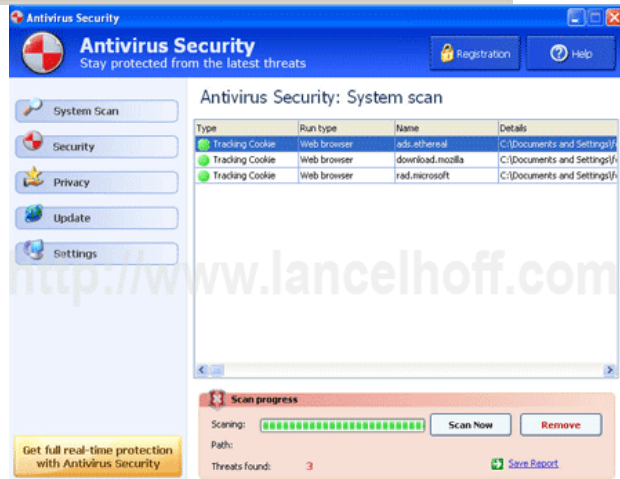

It is recommended that the user unplug the network cable from the back of the computer and call their computer support immediately. Users can also use the combination of "ALT + F4" to kill the pop up window.

Below are examples showing some instances of this fake software:

UNCLASSIFIED//FOR OFFICIAL USE ONLY

Warning: This document is FOR OFFICIAL USE ONLY. It contains information that may be exempt from public release under Louisiana Revised Statutes. It is to be controlled, stored, handled, transmitted, distributed, and disposed, of in accordance with LA-SAFE's policy relating to FOUO information and is not to be released to the public, the media, or other personnel who do not have a need-to-know without prior approval of an authorized LA-SAFE official. Persons or organizations violating distribution restrictions will be prohibited from receiving future documents and will be removed from distribution list. Please contact LA-SAFE, if you have any questions or need any further information
