Social Networking and MySpace

What Are Social Networking Sites?

- Social networking sites have one stop shopping for online content, activities and features.

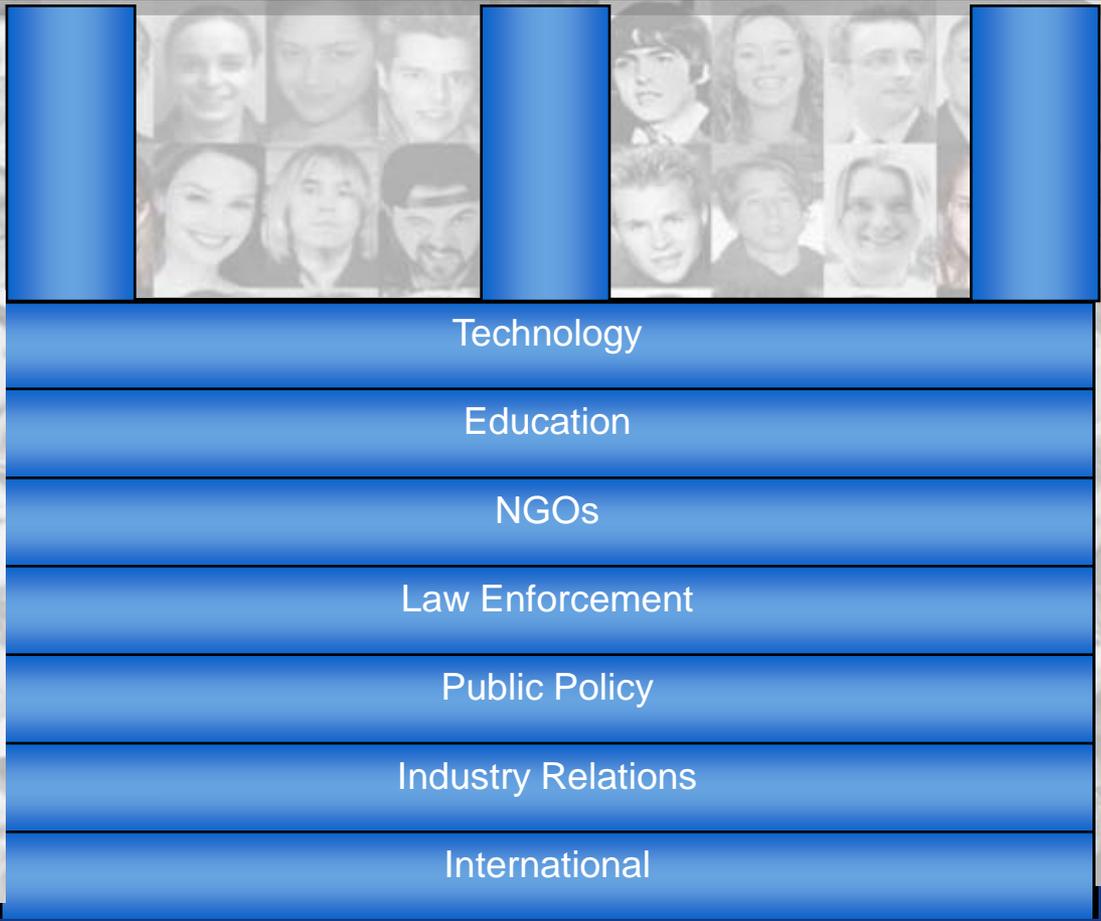

- Some of the larger social networking sites on the internet, aside from MySpace.com, are Xanga.com, Facebook.com and Friendster.com. Bebo.co.uk and Piczo.com are popular in the U.K.

The MySpace Generation

- 1 in 4 Americans are on MySpace
- 85% of members are 18+
- 110 million monthly users in US
- 300,000 new registrants daily*
- 15 million total images uploaded daily
- 70,000+ videos uploaded daily
- 50 million messages sent a day
- Localized versions in 30 regions across 15 languages

**Work with Law Enforcement**

Contact

- **Keep predators off of MySpace**

- **Prevent unwanted contact**

What We're Doing:

- Email verification of new members
- Users under 18 are automatically assigned a Private Profile
- Adults can never add under 16's as a friend unless they know the under 16's last name or email address (adult must know the user in the physical world)
- Users under 18 can block all users over 18 from contacting them or viewing their profile
- If users under 16 override their privacy settings, they are still only viewable by other users under 18
 - No user can Browse for users under 16
 - Sentinel SAFE

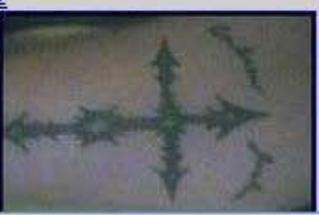

Fox Interactive Media in partnership with Sentinel Tech Holding Corp. has created the first national real-time searchable sex offender database called Sentinel S.A.F.E.

Using several points of data, MySpace user information is compared to RSO data to create a pool of potential matches.

That pool is then reviewed by human agents to designate matches, then remove and report the profiles in question.

Email Legislation

11 states have already passed legislation requiring RSO's to register their email addresses and have established related punishments for non-compliance, including additional jail time

The United Kingdom and Australia are exploring similar legislation.

Content

- **Keep inappropriate content off of MySpace**
- **Block teen access from age - inappropriate content**

What We're Doing

- Image and Video Review
- Hashing of bad images
- Known bad URL's are blocked from the site
- All group images subject to approval by founder
- Report Abuse buttons
- Profile review and deletion for violations
- CAT Team

MySpace Alert

Please read these safety tips before posting any photos or personal info.

MySpace is a public space. Don't post anything you wouldn't want the world to know (e.g. your phone number, address, instant messenger screen name, or specific whereabouts). Don't post any nudity, violent, or offensive material, or copyrighted images. If you violate these terms, your account will be deleted. [[photo policy](#)]

People aren't always say who they are. Exercise caution when communicating with strangers and avoid meeting people in person whom you do not fully know. If you must meet someone, do it in a public place and bring a friend or trusted adult.

Harassment, hate speech, and inappropriate content should be reported. If you feel someone's behavior is inappropriate, react. Talk with a trusted adult, or report it to MySpace or the authorities.

I have read the safety tips. I know that complete safety tips can be found at the bottom of every MySpace page.

Privacy Access for Applications Your Friends Installed

Why do my friends' applications need my data?

Applications that your friends add may need to know some information about you in order to work.

Example: If your friends added a "best friends" application, they would want to be able to see your name and photo in a list of all their friends so that they can pick you as a best friend.

Friend Application Privacy:

Share basic data (name, display photo, friends, age, gender, location).

Allow my friends' applications to access my public photos and photo albums.

Don't share any data. (You must remove all your applications in order to set this option)

Conducting Your Investigation: Locating A Profile

- **Locating A Profile**

- Browse and Search
- Friends List
- Real Life Friends
- Name/Data can be changed at any time.
- The **Friend ID**, located in the web address, is the most important piece of information.
- **MySpace needs a Friend ID or the full URL to the profile in order to assist.**

The display name is not a valid identifier

The friend ID number is the best way to reference an account

Conducting Your Investigation: Investigative Resources and Evidence Collection

- **The Friends List as a Resource:**
 - A user's closest associates will most likely be on the front of their profile.
 - Frequent comments from a user may also illustrate their closeness to the profile owner.
- **How to collect evidence**
 - Any public evidence can be collected by saving the HTML of the page in question as deleted content may not be retained by MySpace (File > Save As).
 - Information only viewable to friends may be collected via user consent, or you can create a profile and send them a Friend Request.
 - Any other information will require legal process to retain.

Conducting Your Investigation: Next Steps

1. Identify Profile
2. Save electronic copies of all front end/public portions of the profile.
 - Image Galleries, Comments, Friends List, Blog Entries
3. Contact MySpace if you require back end data to be preserved.
 - Let MySpace know if you would like the account locked.

Getting content removed

- If the content is illegal in nature, or needs to be removed due to an investigation, please contact MySpace with the web address(es) to the profile/content.
- Other content (such as more general image theft, underage users, etc) can be reported to through our Contact form.
- Please read our Terms of Service in regards to what content violates our TOS.

Ongoing Investigation: Monitoring Profiles

- Officers can create profiles on MySpace to see more information on a profile, such as images in the gallery, comments, and blogs.
- Users will not know if you are looking at their profile. If you are concerned, do not put personally identifiable information on your profile.
- Parents can use monitoring software and open communication to monitor their child's online use.
- Social networking sites create an environment where you can search for people through other people. Use this to your advantage, and spend time on the sites to understand how they work.

MySpace Resources for Law Enforcement

- **Data retained by MySpace**
 - IP activity related to all logins and image uploads are retained for at least a year.
 - Basic subscriber information is retained for at least a year.
 - Private messages, blogs, and comments are available if they still exist live on the site.
 - Deleted front end profile information is NOT retained by MySpace, nor do we retain previous versions of the profile.
- **Contacting MySpace**
 - MySpace may be contacted via its 24/7 Law Enforcement hotline.
 - MySpace may also be contacted via its Law Enforcement and Compliance email addresses.
- **MySpace Law Enforcement Investigators Guide**
 - Provides contact information, overview, policy details, and sample forms helpful in obtaining and understanding information from MySpace.
 - The guide and the information contained therein is available for law enforcement use only.
 - You can obtain the guide by emailing LawEnforcement@MySpace.com. Please provide us with contact information so we may verify identity and ensure you receive updates.
- **Official MySpace Profile for a Law Enforcement Agency**
 - Please contact us if your department creates an official MySpace profile, so we may verify it on our back end.

Available forensic evidence available on the local machine of the user

- **MySpace IM Chat Logs:** MySpace IM chat logs by default are stored to the local machine.
- **Cookie Data:** If a user logged into that machine accessed MySpace.com, and did not clear their cookies, you can locate cookies with user information. The cookies will be named 'username@word.myspace.com'
- **Cached MySpace Pages:** Electronic copies of viewed MySpace pages will be stored to the local machine temporarily (until the user or machine flushes them out). Images viewed by the user that were stored on MySpace will also be stored here.
- **Stored login information:** Sites and browsers allow users to 'save' their login settings. Check form fields in the browser to see if they have pre-populated information.

WELCOME / MYSPACE BASICS

MySpace is the premier lifestyle portal for connecting with friends, discovering popular culture, and making a positive impact on the world. MySpace users find old friends and family members, plan their social lives, discover new music, promote charities and civic causes, and express themselves creatively on their MySpace pages. MySpace is a new mechanism of communication and self expression for the Internet generation.

Find out more by clicking on the topics listed on the left.

Why Teens Are on MySpace

Millions of people have created personal profiles on MySpace, but it is an activity that has resonated especially with adolescents. In fact, 61% of teenagers have a personal profile on a social networking site. Teens 14 and older use MySpace to connect with friends and find others that share similar interests. MySpace plays an important communication and social support role in teens' daily lives. They are using MySpace to express themselves, their thoughts, ideas, creativity, and opinions on politics, art, music and life. The site also provides a place for teens to discover and showcase their various talents, such as filmmaking, comedy and music.

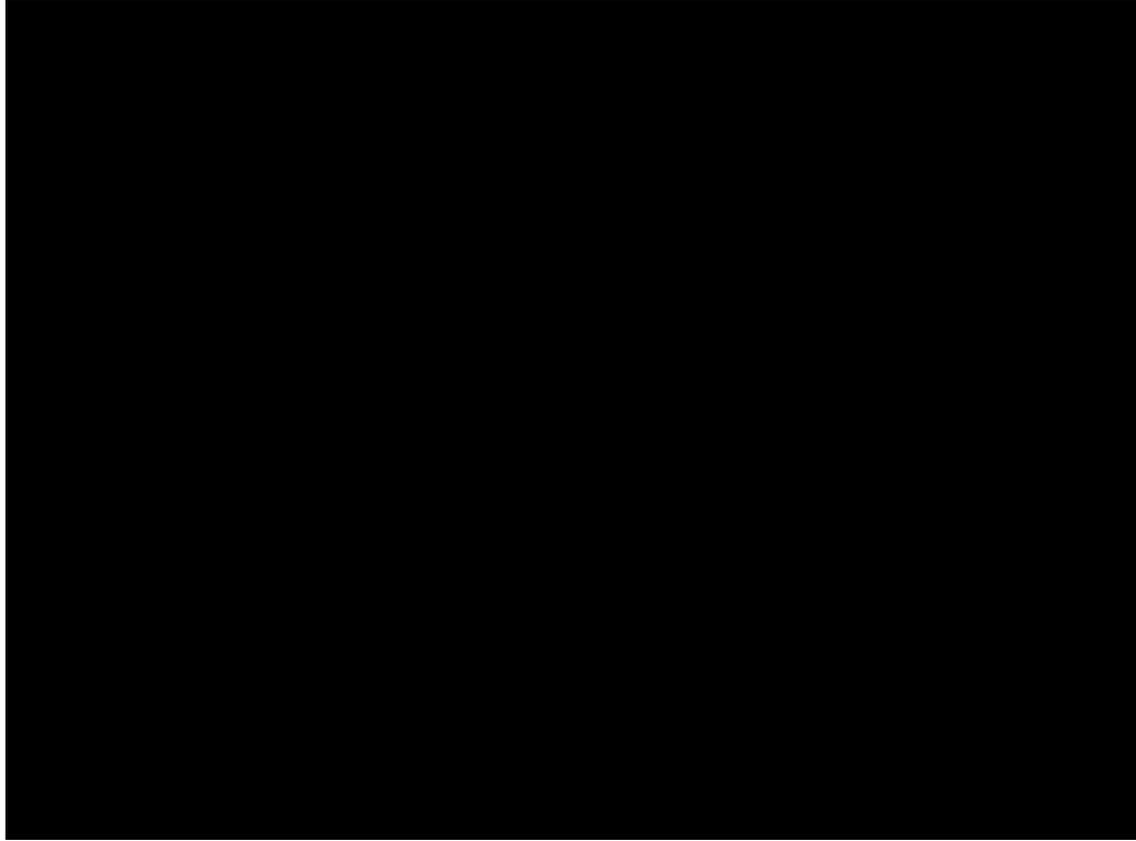

MySpace Safety Section

- Direct access for Parents
- Safety tips and videos
- Section for teens and online safety
- Information publicly available and for your immediate use!

The screenshot shows the "myspacesafety" website interface. At the top, there is a red header with the text "myspacesafety". Below the header is a navigation bar with several tabs: "safety home", "for parents & educators", "for teens", "more resources", "safety videos", and "safety tips & settings". The main content area features a large blue banner with the MySpace logo and the text "myspace.com™ safety & security". Below the banner is a "SAFETY HIGHLIGHTS" section. On the left, there is a "FEATURED TIP" section with a checkmark icon and the text "Your profile and MySpace forums are public spaces". Below this tip is a paragraph of text and a link "Get more safety tips...". On the right, there is a photo of a man in a blue shirt and a paragraph of text. At the bottom of the page, there is a green banner with the text "more safety & security resources".
