2.4 CSDs	
2.5 Investment banks	
2.6 Custodian banks	
2.7 Brokers	

Chapter	Contributors
2.8 CCPs	
2.9 Payment banks	
2.10 Others	
3. T2S General principles	T2S Project Team
4. T2S Scope requirements	TG1
4.1 Product scope	
4.2 Process scope	
5. Processing schedule requirements	TG1
5.1 Schedule of settlement day	
5.2 Calendar	
6. Role requirements	TG4
6.1 T2S operator	
6.2 CSD	
6.3 T2S Party	
6.4 NCB	
6.5 Payment Bank	

Chapter	Contributors
7. Settlement instruction management requirements	TG2, TG5
7.1 Settlement instruction processing requirements	
7.2 Settlement instruction type requirements	
7.2.1 Standard DVP settlement instructions	
7.2.2 Standard FoP settlement instructions	
7.2.3 Conditional settlement instructions	
7.2.4 Corporate event settlement instructions	
7.3 Settlement instruction validation requirements	
7.3.1 Validation processing	
7.3.2 Validation of incoming settlement instructions	
7.3.3 Re-validation due to	

Chapter	Contributors
update of static data	
7.4 Settlement instruction maintenance requirements	
7.4.1 Hold and release mechanisms	
7.4.2 Amendment of instructions	
7.4.3 Cancellation	
8. Settlement instruction matching requirements	TG2
8.1 Matching processing	
8.2 Matching of settlement instructions	
8.3 Matching attributes requirements	
8.3.1 Mandatory matching fields	
8.3.2 Additional matching fields	
9. Settlement eligibility requirements	TG2

Chapter	Contributors
9.1 Settlement eligibility processing	
9.2 Checking eligibility of settlement instructions	
10. Provisioning and Monitoring of liquidity	TG1, TG3, TG5
10.1 Provisioning and monitoring liquidity	
10.2 Cash positions and limits	
10.3 Cash limit maintenance and monitoring	
10.4. Central bank global cash monitoring	
11. Settlement processing requirements	TG2, TG3, TG5
11.1 Settlement processing requirements	
11.2 Processing algorithms	
11.2.1 Corporate event	

Chapter	Contributors
settlement	
11.2.2 Settlement inside a CSD	
11.2.3 Cross-CSD settlement	
11.2.4 Settlement with CSD outside T2S	
11.2.5 Optimisation model requirements	
11.2.6 Sequencing requirements	
11.2.7 Linked instructions	
11.2.8 Collateralisation	
11.2.9 Recycling	
11.3 Settlement of specific categories of securities	
11.4 Special settlements	
11.4.1 Conditional settlement	
11.4.2. Multilateral settlement	
11.5 Direct holding accounts	
11.6 Day settlement	
11.7 Night settlement	
12. Holdings	TG4

Chapter	Contributors
12.1 Securities account holdings	
12.2 Reservation and blocking of holdings	
13. Configuration requirements	TG1, TG2, TG4, TG5, TG6
13.1 Multi-entity configuration	
13.2 Business date	
13.3 Daily processing schedule	
13.4 Closing day calendar	
13.5 Authentication and authorisation	
13.6 Tolerance amounts	
13.7 Code table management	
13.8 Authentication parameters	
13.9 Roles and privileges for authorisation	
13.10 Services and service subscriptions	
14. Connectivity requirements	TG5

Chapter	Contributors
14.1 CSDs	
14.2 T2S parties	
14.2.1 Direct	
14.2.2 Indirect	
14.3 Central banks' systems	
14.3.1 Target 2	
14.3.2 CCBM2	
14.3.3 Other RTGS	
15. Messages and interface requirements	TG2, TG3, TG4, TG5
15.1 Overall message requirements	
15.2 Message subscription mechanism	
15.3 Reporting / queries / messages	
16. Static data requirements	TG1, TG4
16.1 General principles	
16.1.1 Data revision and data	

Chapter	Contributors
history	
16.1.2 Static data management	
16.2 Currency reference data	
16.3 Securities reference data	
16.4 Party reference data	
16.4.1 Hierarchical party model	
16.4.2 CSDs	
16.4.3 T2S-Party	
16.4.4 Securities accounts	
16.4.5 Cash accounts	
17. Volume and scalability requirements	TG1, TG2, TG3, TG4, TG5, TG6 CSDs
